Persuing excellence in design and fabrication for over 50 years

TubeCo Pty Ltd are your specialist manufacturers of metal beds and bunk beds and have over 50 years' experience in the metal fabrication industry.

Each of our products are handcrafted and quality controlled to ensure that each product leaving our factory is nothing short of perfect.

We pride ourselves on the strength, durability and quality finishes of each of our products we manufacture.

Why choose TubeCo

Besides our obsession with quality, strength and durability, TubeCo are Australian owned, producing Australian made products and keeping Australians employed. We manufacture our products in our Sydney factory from raw materials through to the complete finished and powder coated product. All of our products are made to order yet we are still able to keep our lead-times to a minimum.

Our in-house capabilities mean we are able to offer customer orders and a wide range of powder coat colours. We deliver to the Sydney metropolitan area and also have contacts in the freighting industry meaning we can provide cost effective freight options nationwide.

Our products

Our product ranges consist of both domestic and commercial beds and bunks. Our domestic range has been designed for every day in-home use. All domestic products are designed with our in-house nut and bolt system and timber slat base. Our timber slats are of high quality, thicker and more durable (90x35) than the industry standard. Our commercial range of products are designed for the accommodation industry. All commercial products are designed with our in-house taper system and weld mesh bases. Our in-house taper system is a male/female connection that gets stronger with time and use and our weld mesh bases, whilst also adding additional strength, assist in keeping those pesky bed bugs at bay. Each product is fully welded, not tac-welded like comparative products available in the market, which adds strength to joins and reduces the risk of internal corrosion. All of our bunk beds are manufactured to the Consumer Protection Notice (CPN) also known as the Orange Tick standard with a selected few certified to either the orange tick or full Australian Standard AS/NZS 4220:2010 also known as the Blue Tick Standard.

Warranty

We're so confident in all our Australian made products that we offer a 10 year manufacturers warranty.

DOMESTIC RANGE

DOMESTIC RANGE

Our domestic range has been designed with the practicality of everyday use in mind whilst keeping up with the latest homeware trends.

All products within this range have our specially designed in-house nut and bolt system incorporating a timber slat base. Our timber slats are of high quality, thicker and more durable (90x35) than the industry standard. Each product is fully welded, not tac-welded like comparative products available in the market, which adds strength to joins and reduces the risk of internal corrosion. All of our bunk beds are manufactured to the Consumer Protection Notice (CPN) also known as the Orange Tick standard.

We understand that consumers are buying bedframes for long-term use which is why we choose high quality raw materials and take pride in our manufacturing and quality control to ensure our products are **"Built for life"**.
