

COMPETITION TIRE DRESSING

A NEW LEVEL OF SHINE

"Top Line Chemicals is dedicated to your bottom line performance."

Competition Tire Dressing is a water-based formula that leaves a brilliant shine on tires and will not sling once cured. Curing time depends on ambient temperatures that can typically range from 5-15 minutes. This long-lasting tire dressing can last up to two weeks and will not readily wash off during rainy periods.

Competition Tire Dressing may be used in an automatic online car wash production application or by hand applied sprayer, brush, or sponge.

Consult with your Top Line Chemical Solutions representative for maximum efficiency and results.
