

OUT SHINE ON-LINE

A NEW LEVEL OF SHINE

"Top Line Chemicals is dedicated to your bottom line performance."

Outshine Tire Dressing is a highly concentrated silicone-oil based formula, leaving a brilliant and long-lasting shine on tires and will not sling if properly applied. Very little goes a long way, providing superior product and cost performance.

Outshine Tire Dressing may be used in an automatic online car wash production application or by hand applied sprayer, brush, or sponge.

Consult your Topline Chemical Solutions representative for any questions or to request samples today.
