

PETROSOLVE

TAR REMOVER

"Top Line Chemicals is dedicated to your bottom line performance."

Petrosolve premium solvent aggressively dissolves and removes stubborn tar and adhesives along with heavy grease, waxes, and silicones from most automotive exterior surfaces.

Apply product directly to affected areas and allow to dwell for 30-60 seconds and then wipe clean with a soft microfiber cloth.

If applying to plastic surfaces such as bumper covers, moldings, etc. try product in an inconspicuous area first to determine product compatibility with surface material.

Cease use and wash area with soap and water if surface reacts with product.

As with all chemical products, follow safety warning and guidelines included on the product label.

Consult with your Top Line Chemical Solutions representative for maximum results.
