Trimble Business Center	Varies, Starting at \$10,000	https://geospatial.trimble.com/prod ucts-and-solutions/trimble-business- center	Firmble Business Center is a professional grade GIS Suite that includes Photogrammetry, 3D Modeling, GIS, Survey, CAD Features and more. TBC is not a entry level software. It is widely used by industry professionals for all GIS use cases.
ArcGIS	Varies: Non Commercial \$100.00, Commercial Starting @ \$800	https://www.esri.com/en- us/arcgis/products/arcgis- pro/overview	ArcGIS is the most widely used GIS software worldwide. Government agencies, Private Industry and everyone in between uses or has used ArcGIS at some point in their Geospatial portfolio. ArcGIS is the industry standard.
QGIS	Free	https://www.qgis.org/en/site/	QGIS is a open source and free GIS suite that aims to rival Arc. QGIS has a plethora of tools included within it and has multiple plugins that can be added. Keep in mind see it's free it isn't as refined or polished as ArcGIS nor does it have as many features.
Google Earth Pro	Free	https://earth.google.com	Google Earth is most likely the most used GIS platform in the world. It can do many things and is user friendly for Non - GIS professionals. Although it isn't the most powerful GIS software it is a indispensible tool in the Drone Mappers toolkit.
