Meeting *Preview*

A Night That's Under "Control"

Our October speaker will be Rick Fellows from KMC Controls. Rick will cover several topics related to the BACnet protocol. Rick will go over the current state of wireless BACnet. He will discuss integration of BACnet with the Smart Grid, via the Open Demand Response protocol. Also covered will be emerging difficulties for system integrators and commissioning agents, with factory supplied BACnet controls.

Finally Rick will discuss how to better specify control systems, to insure a high performance building. You will want to be sure to come to our Controls Night meeting this month, for Rick's presentation!

Richard A. Fellows

Richard has thirty-five years experience in the temperature controls building automation industry, starting with a BSEE at Oregon Institute of Technology. Most recently he has worked twelve years with Alerton and five years with KMC Controls. Both companies are manufacturers of Native BACnet Building Automation Systems. Currently Richard is Vice President of Business Development at KMC Controls. He is responsible for managing sales in the Western states and expanding markets for KMC's products.

American Society of Heating, Refrigerating, and Air Conditioning Engineers

ASHRAE, founded in 1894, is an international organization of 55,000 persons. Its sole objective is to advance through research, standards writing, publishing and continuing education the arts and sciences of heating, ventilation, air conditioning and refrigeration to serve the evolving needs of the public.
