PRESIDENT'S MESSAGE

Firstly, we look forward to seeing all of you again!

As we can all agree, the future of our business is exponentially even more challenging. With the demand for sustainability, energy efficiency and higher quality environments, project delivery options are even more numerous and this includes an ever increasing complexity of engineering options.

As you know, ASHRAE is the leader with regard to delivering standards for our Industry and, as engineering demands are greater, we must be more diligent. This means we need to have not just good engineers, but great executive engineers. This is an exciting challenge as there are so many ways we can contribute.

The success of this, and all Chapters, therefore, is in our hands. It is this Chapter's goal to communicate even more effectively through our selection of speakers and support to our industry by becoming even more involved in supporting our student engineers, as we do with Cal Poly Pomona.

Having said this, our goals this coming year are to:

- Increase membership, in general, but specifically student membership and their involvement within the Chapter;
- Encourage better attendance at our meetings;
- Be diligent about our selection of speakers for the coming year;
- Provide better training and education;
- Work more effectively together to keep up with all the activities and the success of the group and membership as a whole; and
- Reach out to the community to promote the value of what we can offer.

Once again, I thank you for the privilege to serve and thank all of you who volunteer their time and resources.

Please feel free to contact me with any and all suggestions to improve what we do and can offer to have another successful year!

Respectfully,

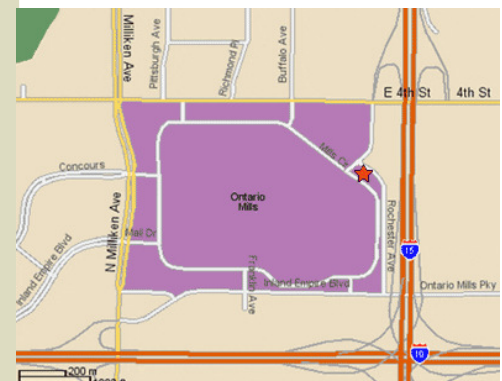

Tim

TIM HALD
President 

MEETING LOCATION

We hope that you will be able to make it to our first Tri-County ASHRAE meeting of the new year. New York Grill is located just outside of the Ontario Mills Mall just southwest of 4th Street and the 15 Freeway.

New York Grill
950 Ontario Mills Drive
Ontario, CA 91764

Directions from the South

1. From Interstate 15 (near the 15 and 10)
2. Exit on 4th St.
3. Turn right onto 4th St.
4. Take your first left into the Ontario Mills.
5. The New York Grill is on your left.

UNITED WE STAND

MEETINGPREVIEW

Our program this month focuses on what your local public utilities can do for you and your clients. Our first presenter is a Technical Specialist with SCE's New Construction Services group who will present an overview of the Savings by Design (SBD) program. SBD is a statewide program encouraging high-performance nonresidential building design and construction through design assistance, owner incentives, design team incentives, and energy design resources

Our second presenter will be a project manager with SCE's Economic Development Services group who will be on hand to share ways that SCE is working to attract and retain Southern California businesses, including a new GIS-based toolset used to identify prime properties to meet businesses relocation and expansion needs.

Our last presenter will discuss even more programs and offerings that the Public Utilities Commission has charged SCE and the other major public utilities to administer. These programs focus on incentives that are available for installing energy efficient solutions in modernization projects. Incentives are available for all sorts of upgrades from lighting, to hvac, to water pumping.

All of the programs being discussed are available to any and all non-residential customers who pay SCE, PG&E, SDG&E or SoCal Gas for utilities. Believe it or not, these programs are funded by you, the ratepayers! Come out and learn how to help your clients save energy, save money, and succeed in business!

Thanks to Kyle Landis for pulling this program together!

— journal of the tri-county chapter of the —

American Society of Heating, Refrigerating, and Air Conditioning Engineers

ASHRAE, founded in 1894, is an international organization of 55,000 persons. Its sole objective is to advance through research, standards writing, publishing and continuing education the arts and sciences of heating, ventilation, air conditioning and refrigeration to serve the evolving needs of the public.
