ASHRAE’S CORE VALUES

As we proceed through our 2021-2022 Tri-County ASHRAE season, let’s continue to keep ASHRAE’s core values in mind…

Excellence
ASHRAE education, technical information and all other activities and products will always reflect the best practices that lead our industry. We strive for continuous improvement and innovation in all our practices and products.

Commitment
ASHRAE and its members are passionate about serving the built environment, creating value, and recognizing the accomplishments of others.

Integrity
ASHRAE is committed to the highest ethical standards. We work transparently, observing essential requirements for due process and peer reviews to assure our members and stakeholders that we do the right things the right way.

Collaboration
ASHRAE seeks and embraces collaborative efforts with organizations, agencies, and individuals sharing our commitment to sustainable built environments.

Volunteerism
Members lead ASHRAE at every level, serving ASHRAE and helping ASHRAE serve society.

Our ASHRAE Tri-County leaders for the 2021-2022 season!

**Officers**

President: Manny Perez / CDI Curbs  
President Elect: Walter Escamilla / Custom Cooling Company  
Secretary: Chris Van Dyke / Consulting  
Treasurer: Jhonattan Sebastian / Willdan Energy Solutions

**Board of Governors**

Past President: Michael Franzen / Franzen Consulting  
Board Member: Felix Monterroso / Willdan Energy Solutions  
Board Member: Kakeru Fujikawa / Goss Engineering Inc.  
Board Member: Erick Delgado / Dawson Co.

About us!
Materials Concerns in HVAC Equipment

Presentation Summary:

This session is an introduction to the areas in which HVAC equipment manufacturers and design engineers have influence on increasing the use of healthy materials in equipment. Topics areas include an introduction to the principles around the use of healthier materials, the key product or components where materials of concern are found in HVAC equipment, and the steps the industry can take to begin to convert the supply chain. This session expands on the speaker’s October 2020 ASHRAE Journal article on these topics.

Find Out More!

ABOUT THE SPEAKER: Erin McConahey is a Principal in Mechanical Engineering with Arup, an employee-owned global engineering, advisory and planning consulting firm. During her 26 years with Arup, she has worked internationally and now leads multidisciplinary design teams in Los Angeles on a wide variety of project types.

Erin’s passion for finding integrated design solutions through a collaborative design process began with a Bachelor’s degree in Mechanical Engineering and a Master’s degree in Structural Engineering from the University of California at Berkeley. As she rose in leadership within her firm, she served on Arup’s global Trustee Board, was named an Arup Fellow for her technical excellence, spearheaded the Americas Region Diversity and Inclusion Initiative, and served on the leadership teams for a number of training programs. These service opportunities, coupled with growing concern over climate change, led her to a second Master’s degree in Ethical Leadership from Claremont Lincoln University.
ASHRAE, founded in 1894, is an international organization of more than 55,000 persons. Its sole objective is to advance through research, standards writing, publishing and continuing education the arts and sciences of heating, ventilation, air conditioning and refrigeration to serve the evolving needs of the public.
