## UPOMING MEETING

**MAIN PROGRAM:** Post-Pandemic Upgrading & Re-Commissioning of Existing Buildings, in Practice

Our speaker this month will be Tracey Jumper from Microsoft. Her presentation includes a range of case stories: a regional hospital with Covid surges, a university campus with too many types of facilities and systems, and a large unified school district with public town halls and only a few weeks for ventilation fixes.

Do you want to know how maintenance and improvement practices have changed since the pandemic lockdowns and re-openings occurred? Learn how existing facilities experts have been addressing improvements in expedient but smart ways. Learn how it's possible to assess and implement improvements for ventilation, filtration, and controllability even when space use, HVAC systems and controls are all different.

Tracey is Director of Commissioning - Special Projects at Microsoft (Formerly Director/Co-Founder of Commissioning at EMCOR Mesa Energy Systems). She has 22 years of experience in construction, mechanical systems engineering and maintenance services and has been identified as a specialist in commissioning and improving existing buildings. She holds a bachelor's degree in architectural engineering from Penn State.
