UPCOMING MEETING

MAIN PROGRAM: High-Mass Radiant Heating and Cooling System Design – Past, Present, and Future

Speaker: Devin Abellon

Hydronic radiant heating and cooling systems have been proven across the world as an effective strategy to provide healthy and comfortable indoor environments while reducing overall energy consumption compared to conventional HVAC system approaches. This presentation explores the history of hydronic radiant systems, the fundamentals of radiant system design from the context of current design best practices, how radiant systems can help address today's challenges of decarbonization and IEQ, and what the future holds for radiant system analysis, installation, and operation.

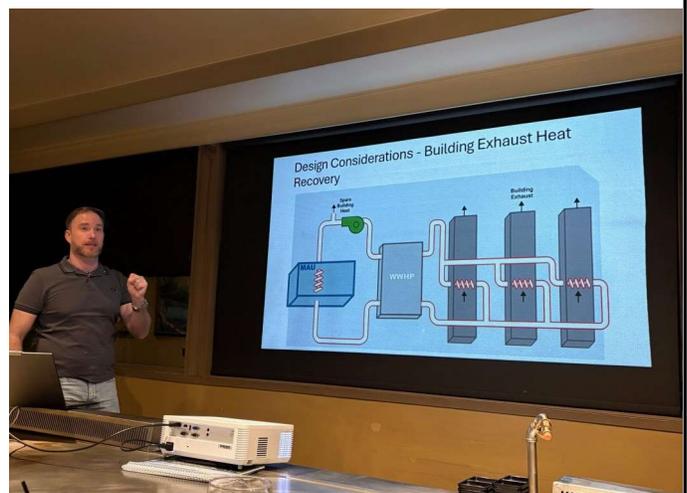

Devin Abellon, P.E. is the Director of Engineered Solutions at Pac West Sales in Portland, Oregon. He has over 30 years of experience in the HVAC and plumbing industries with a focus on high-performance and sustainable building design and construction. He holds a Bachelor of Science degree in Mechanical Engineering from the University of California at Santa Barbara. He has been an active member of ASHRAE at the chapter, regional and society levels and currently serves as a Society Vice President, Chair of Technology Council, and Vice Chair of the Board of Directors DEI Advisory Subcommittee. He also serves as a Distinguished Lecturer.
