Criteria for judging talent competition

Here is a fictitious judgment about the competition of Christmas gifts. This is to consider this is my opinion as a judge and the way I evaluate the provisions based on the requirements of the judges.

Therefore, we have at least 10 judges in each competition. There is an element "Wow, amazing" that is almost impossible to determine, but it is clear when you see it. Such ingenuity can compensate for small disadvantages in presentations in the Francisco region. It is worth noting that the project contains a file that is actually the main part of the project. However, this requires more instructions to create a project. It looks more complicated than the pressure of the portrait of the silhouette on the tree - 8 This project works great as a gift. He has a great story, there is a unique idea. Although the project does not contain instructions to manipulate photographs, it refers to the textbook - these steps may not check whether there is a perfect textbook elsewhere. I mixed because the last step does not explain the adhesive process. Sutcene Picnic Table - 9 This project achieves all criteria. It would be a fantastic gift for every family member or friend. This is a new rotation when I restored the suitcase again - I didn't see anything like that. It is divided into appropriate steps and each step is explained in great details. Of course, the project works and was used. Fish Skeleton Rings - 3 These earrings will be a great gift for almost every lady and it is great that the files are connected to your Lazka. However, because there is lasercut, there are not many documentation. Although the presentation is good and the photos are clear, it is not as full as most. The project is also not the most creative - fish earrings for Ecco Christmas gift evaluation process. Please note that this is my opinion as a judge and how I assess candidates against the assessment requirements. Every judge is different and interprets the requirements of the judgment differently. This is why we have at least 10 judges for each competition. There's an element of "wow, fantastic" that's almost impossible to define, but it's obvious when you see it. This ingenuity can compensate for minor imperfections in the presentation of the San Francisco County Wooden Wall Map - 5. This project scores points for subject matter and ingenuity/creativity. It's great to have a file included in the project that really makes up the bulk of the project. However, the project requires some guidance. This seems more complicated than a simple Sagoma Xilography - 8 Portrait Print. This project makes a great gift. It has a great story and a unique idea. Although the project does not provide instructions on how to manipulate the photo, it does link to a tutorial: there is no need to explain these steps again if there is an excellent tutorial elsewhere. I lowered it by one point because the last step won't exhaust the gluing process.
