## CARUNA SWIVEL SEATS

Caruna swivel seats are a result of years of study, testing and feedback from prospective users. The seats blend into the vehicle elegantly and are always easy-to-use.

Accessible, comfort and ergonomics functionality in one use.

The seats swivel out to enable wheelchair transfers and walker transfers to your vehicle as convenient as practically possible. We make sure also that your back, thighs, and lower hip are at their most convenient positions, so as to promote a good blood flow even during long rides.

Using topologically optimised lean spiderweb metal design, the automatic mechanism blends in to the vehicle interior making it even better than a conventional vehicle seat.

### ADAPTABLE

Adapts to almost any vehicle segment and flooring plan. Our quick manufacturing turn-around time makes sure your product gets delivered fast.

### AFFORDABLE

Half the cost of any other similar imported products, at much higher quality.

### FOOTREST:

A footrest feature has been integrated into our seats to take care of high ground clearance vehicle ingress. The footrest pops-out as soon as the seat reaches the door side hinges and vice-versa. The footrest can easily take the weight of almost any passenger.

### HAND CONTROL:

Easy-to-use hand control with hold-to-run buttons to ensure maximum safety. The seat electronics take care of the rest.

### ADVANCED ELECTRONICS

Highly advanced seat motor electronics can be easily programmed to any individual's dimensions. These make the seat movements seamless.

## Option-1

With your existing bucket seat

Your existing bucket seat is custom-fit to our automatic plate mechanism

The complete seat + automatic mechanism is shipped back to your location, where a mechanic programs seat movement to your height and weight.

## Option-2

Complete assembly set shipped to your location.

Caruna Bucket Seats™ automatic mechanism assembly shipped out to your location on receipt of P.O.

Entire assembly can be easily custom-fit by any local automobile mechanic.
