

Frequently Asked Questions

Q: How do I view and download video from the POD?

A: You can connect to the POD via cellular, wi-fi or wireless. View live video and move your pan-tilt-zoom cameras using the included software, Internet Explorer or smartphone app. Search, playback and download video remotely as well.

Q: How much video or how many days of video can the POD store?

A: From 5 days up to a few months depending on how you configure each camera and how much activity there is in the area. You can choose recording speed, quality, motion sensitivity, motion fields, schedule, etc for each camera in which cases, some PODs have recorded up to 15 months. There is also the option of upgrading the standard 2TB hard drive to 12TB.

Q: Is it really portable/mobile?

A: The POD weighs just around 30lbs and comes with a custom mount that straps onto a pole. It only requires 110 power which you can get easily when it is mounted on a streetlight that has a photocell by using our photocell power adapter. It's so easy that many clients install and move their PODs themselves.

Q: How far can the pan-tilt-zoom camera go?

A: The pan-tilt-zoom cameras on our standard POD can read license plates from up to 2 blocks or 2 hundred yards away. (See picture on POD Features panel on this brochure)

Q: Is there a solar option?

A: The PODs and Satellite PODs can be made to work with solar. We do offer a Solar Power Station that includes the solar panel and Li-Ion battery. Keep in mind - the larger the POD, the larger the Solar Power Station will have to be and the less portable it becomes.

All-in-One System

With 4 Camera Views, the i4POD is the affordable camera solution for parks and public areas.

Force Multiplier

Quick to Deploy and Needing Only 110 Power makes the POD versatile for monitoring areas of concern.

Deterrent

The POD's flashing Blue Strobe Light and 24/7 live view and recording makes it a valuable tool for deterring unwanted activity.

Satellite POD System

The **i2IP** and **i4SIP** PODs are IP based portable systems that can add smaller satellite camera PODs to connect and record back to it wirelessly.
2 Camera Satellite POD - **\$2,195***

*A Satellite POD can have up to 4 fixed cameras. 4 Camera Satellite with 4 fixed cameras will be \$3980. One (1) PTZ camera can replace a fixed camera for \$1795.
Example: 2 Camera Satellite POD with 1 fixed camera and 1 PTZ will be \$2790.

Already Have Cameras??

For those already using other Video Management Software like Milestone, OnSSI, exacqVision, etc. we can customize a POD with preferred cameras and equipment to make a portable solution that will work with any system.

POD Features

- ✓ Up to 4 Camera Views with 3 Pan-Tilt-Zoom Cameras & 1 Fixed on a single device
- ✓ 2TB of Storage in onboard Video Server so recording does not rely on wireless signal (upgradable to 12TB)
- ✓ Up to 45 days of video storage, in some cases 6 months depending on preferred settings (with 2TB)
- ✓ Central Monitoring Software, Web and Smartphone Viewing
- ✓ Infrastructure for Storage and Video Server at Station or Office is NOT needed
- ✓ Minimal Wireless System needed (if Cellular is not used) because recording is directly onboard
- ✓ No Per Camera or Per Computer Software Licensing Fees or Firmware/Software Upgrades Fees
- ✓ Easily moved from location to location since it only requires 110 power and is simple to install

Pan-Tilt-Zoom cameras can read license plates from up to 2 blocks or 2 hundred yards away.
