- (2) License Plate Reader Cameras
- NVR and 4TB Hard Drive Built-In
- Cellular Router & Booster Built-In
- WiFi Ready
- \$8495 One Time Purchase

The LPR360 is the newest member of our POD Systems.

Like all our PODs, the LPR360 is quick to deploy and only requires power. The video is recorded directly to the NVR's hard drive. Using the cellular router, video from all 4 cameras can be viewed live, played back and downloaded remotely using desktop and phone apps.

The Difference between us and them is you have options!

Besides not having to pay every year in perpetuity for each single camera, the other difference is that you can customize your POD to fit your needs and budget.

- Get PTZ cameras instead of 180° cameras. Or cameras that can do advanced analytics, like face detection.
- Use your preferred brand of cameras, routers and computers.
- Record to the cloud or your own server.
- And more...
