

Frequently Asked Questions ?

How do I view & download video from the POD?

You can connect to the POD via cellular, wi-fi or wireless. View live video and move your pan-tilt-zoom cameras using the included software, web browser, or smartphone app. Search, playback and download remotely as well.

How much video or how many days of video can the POD store?

From 14 days up to a few months depending on how you configure each camera and how much activity there is in the area. You can choose recording speed, quality, motion sensitivity, motion fields, schedule, etc. for each camera in which cases, some PODs have recorded up to 15 months. There is also the option of upgrading the standard 4TB hard drive to 20TB.

Is it really portable/mobile?

The POD weighs just around 30 pounds and comes with a custom mount that straps onto a pole. It only requires 110 power which you can get easily when it is mounted to a streetlight that has a photocell by using our photocell power adapter. It is so easy that many clients install and move their PODs themselves.

How far can the pan-tilt-zoom camera go?

The pan-tilt-zoom cameras on our standard POD can read license plates from up to 2 blocks or 200 yards away.

Are there power options?

The PODs and Satellite PODs can be made to work with solar. We can work with your solar provider or help you find one in your area. For power on timers, we offer a battery backup station with Li-Ion batteries.
