WHY AERATE

- Reduces your dependency on water
- Encourages roots to grow deeper
- Helps absorb water
- Encourages thicker turf
- Builds organic material in the soil helping reduce soil compaction

WHY FERTILIZE

Your lawn's health is **important.**

It helps develop a deep root system and better resist heat, drought, and wear damage. Providing essential nutrients to your soil helps rejuvenate your grass and fertilizer will help grow tall, thick, and lush green grass that your neighbors will envy!
