

**Self-Propelled Windrower** 

No other self-propelled windrower helps you produce quality hay faster, more efficiently and more comfortably. With the new WR9900 Series Self-Propelled Windrowers, you can expect added power to handle all crop conditions, a brand-new cab for more comfort and greater hydraulic capacity for increased productivity.

# **Superior Technology**

All main windrower operations, including in-cab conditioner roll pressure adjustment, are controlled via a virtual computer terminal for enhanced precision and better control.

# **Higher-Performance Engines**

AGCO Power™ Tier 4 Final engines deliver more precise power and performance.

# **Advanced Cooling System**

The V-Cool™ system offers greater cooling and fuel efficiencies along with auto-reversing air direction for maintenance-free self-cleaning.

## **Exclusive Rearsteer™ Improves Handling and Road Transportation**

The RearSteer™ option with speeds up to 40 km/h lets you move faster without reversing travel direction.

#### **More Comfort**

Oscillating GlideRider™ rear axle beam increases operator comfort by reducing machine bounce.

# More power to you

WR9900 Series windrowers range from 197–265 engine horsepower. Massey Ferguson now offers a high-power six-cylinder WR9980 option, giving your operation more power than ever before.

Each model features a larger, tandem hydraulics pump for increased hydraulic capacity and control. The added horsepower and hydraulic capacity make the WR9900 Series more capable and versatile, with both models

having the ability to run disc, draper and auger headers

RazorBar

Model	Engine	Rated HP (kW)	Max HP (kW)	Headers
WR9980	AGCO Power 7.4 L	265 (198)	282 (211)	Disc (4 m., 5 m.), draper, auger
WR9960	AGCO Power 4.9 L	197 (147)	208 (155)	Disc (4 m., 5 m), draper, auger
			I talette e	
			Lighting	

Improved lighting and optional LED light package.

## **Fully Customisable**

You can fully program the FNR (hydro) handle to better meet your needs and preferences.

# **More Space**

With 3.7 m³ of interior cab volume, 7.2 m² of glass area and 3 m² of glass on the curved windshield, our VisionCab features a sleek and stylish new look surrounding you in complete comfort.

# **Easy Monitoring**

Touch screen monitor (optional) with intuitive user interface provides easy monitoring and makes setting adjustments quick and simple

# **Hydraulic Hookups**

Combined with the new tandem hydraulic drive, dual hydraulic hookups provide additional power, functionality and control.

### **More Powerful Hydraulic Drives**

Our new generation of electronically controlled hydraulic drives provide increased performance and productivity

# Technology so smart, it practically windrows for you

All systems go. Get an instant and more intuitive view with your choice of monitors. The C1000 is a simple icon-based monitor that is very easy to use. The C2100 is a simple and intuitive 12.1 inch touchscreen monitor that allows you to monitor machine performance while displaying guidance on the same screen.

# WR9900 Series on-board terminal lets you control all of the windrower's main functions, including:

- Header speed
- L/R header flotation / tilt / height
- Header load monitor
- One touch down / one touch up
- Return to cut height
- Return to tilt
- In-cab hydraulic roll tension
- Header drop speed
- Engagement of automatic functions
- FNR handle configurations
- Steering system adjustments
- Auto-Guide™
- Data collection (fuel usage, acres, hours, etc.)
- Troubleshooting information

#### Maximize operational uptime with Fuse® Connected Services

Fuse® Connected Services from your Massey Ferguson dealer means a new level of proactive equipment and operational support to improve efficiency and productivity. Enabled by AgCommand®, AGCO's industry-leading telemetry tool, Fuse Connected Services helps optimize performance through enhanced management of your fleet and individual assets.

Wireless communication via web and mobile platforms allows for easy access to data. Eliminate guesswork with pre-populated service and maintenance intervals for each machine and utilize machine performance analytics, prioritised alerts and theft recovery to minimize downtime.

The new, user friendly interface makes it easy to monitor windrower performance and adjust settings to field conditions.

### A windrower so smart, it talks to itself

Proprietary software on the WR9900 Series allows a variety of components to communicate electronically and execute many of its functions automatically. These components include:

- Automatic header speed
- Automatic load control
- Rotary header speed compensation
- OptiCruise speed control
- Electro-hydraulic steering

#### **Automatic header speed control**

If engine RPMs are pulled down when cutting high-yielding areas in the field or navigating steep terrain, automatic header speed will increase the hydraulic flow to the header in order to maintain consistent disc header RPM for consistent cutting and conditioning.

#### Automatic load control

If Automatic Load Control is activated, the windrower will automatically adjust ground speed based on engine load and header drive pressure to ensure maximum torque and efficient fuel usage. This reduces the amount of operator intervention, simplifies machine operation and reduces operator fatigue.

- Auto-steering
- V-Cool cooling system
- Automatic reel speed
- Automatic header float

#### Rotary header speed compensation

When engaged, the control system will automatically increase the rotary header knife speed as ground speed is increased. This ensures that the ideal amount of crop cut per blade rotation is maintained even as ground speeds change, leading to excellent quality of cut.

#### **OptiCruise speed control**

This function allows for more precise speed control when operating in rough conditions. The two buttons on the back of the hydro handle allow you to increase and decrease your speed smoothly (1 km/h increments in first and second speed range, 3 km/h in third speed range) without having to move the control handle.

# Powerful performance and the versatility you need to get the job done.

The WR9900 Series windrowers feature two different AGCO Power engines, both designed specifically to stand up to the rigors of agricultural use. The WR9960 is powered by the AGCO Power 4.9 L four-cylinder engine and the WR9980 is powered by the AGCO Power 7.4 L six-cylinder engine.

The WR9900 Series are our most powerful windrowers ever. The increased power of these machines gives operators the versatility to run disc, draper and sickle headers. Don't just take our word for it, run any WR9900 Series windrower and you'll know you're driving the cream of the crop.

**AGCO Power engines** built especially for ag application, deliver as much as 265 rated horsepower at 2,100 RPM. As field conditions begin to pull the engine RPM down, the windrower can deliver more than 280 horsepower at 1,950 RPM, giving you the torque and horsepower, you need to keep going in the field.

Fuel efficiency so impressive you'll be able to power through tough crops with minimal fuel usage. Lower engine RPM, precision fuel metering, common rail fuel injection and advanced SCR emission technology are among a few of the innovative engine technologies that will provide you with consistently lower total fluid consumption for both diesel and DEF.

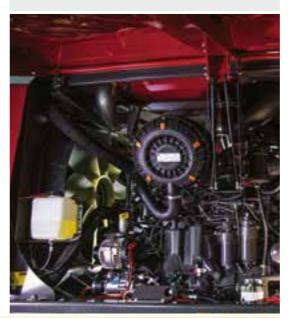

#### New engine updates for improved performance

Increased hydraulic and engine cooling capacity ensure the machine runs at its best, even when conditions are at their worst.

Larger AC evaporator offers a 50% increase in AC cooling capacity.

The engine compartment maintains the familiar cool side / hot side design with ground level access for service points to simplify machine service.

# Be in full control.

Our electro-hydraulic drive system and auto-steering make operating and controlling your windrower easier than ever.

#### **Header Control**

With our innovative hydraulic drive system and fully programmable hydro handle, the WR Series makes operating vour header a breeze. The FieldMax monitor is highly advanced but simple-touse for on-the-fly header adjustments.

#### **Steering Control**

Another Massey Ferguson exclusive, the responsive, electro-hydraulic steering system is the ultimate in precision control. Now you can drive at faster speeds – up to 40 kph on the road – with absolute stability. And you can adjust the steering wheel response and resistance to your personal preferences.

#### **Hydro Handle**

With three set functions and up to 16 programmable functions that can be specific to your operations - you have everything you need at your fingertips.

A handle configuration icon in the FieldMax Monitor will always be visible, so you can view and/or change handle settings with a single button.

#### Or go hands free

Be in full control or go hands-free with Auto-Guide 3000, the world's most advanced auto-steering. Its satelliteassisted steering technology gives complete and automatic guidance capabilities, allowing you to use the full width of your header for tighter rows and less overlap, which results in less time and fuel.

Field speeds up to 28 kph - with extreme accuracy. Our steering and guidance system allow for the fastest auto-guided field speeds in the industry.

All WR9800 Series are fitted with Auto-Guide 3000 that communicates directly with our electro-hydraulic steering, eliminating the need for additional steering hardware. The response time is drastically reduced for a much higher degree of steering accuracy.

Easy to operate - when Auto-Guide 3000 is engaged, the GPS signal replaces the signal from the steering wheel. If the steering wheel is moved by hand, the windrower automatically goes back to manual steering.

# **Specifications**

SP WINDROWER MODEL	WR9980	WR9960		
Dimensions and weight				
Length overall without header (mm)	5,074			
Wheelbase (mm)	3,482			
Height - top of cab (mm)	3,501			
Tread width drive tyres (mm)	3,320			
Tread width tail wheels min. (mm)	2,135-3,277			
Weight (approx.) Without header (kg)	5,180	5,127		
Speed (approx.)				
Field range (km/h)	0-28			
Road range (km/h)	0-35			
Road range with rearsteer (opt.) (km/h)	0-39			
Engine				
Model	AGCO Power 7.4 L	AGCO Power 4.9L		
Rated horsepower (kw)	265 (198)	197 (147)		
Boost horsepower (kw)	282 (211)	208 (155)		
Displacement in.3 (L)	452 (7.4)	299 (4.9)		
Fuel tank capacity (L)	492	492		
Ground drive system				
Туре	Double planetary gear reduction			
Tandem pump	Sauer Danfoss H1 Axial Piston Pump			
Motors	Infinitely variable discplacement			
Flotation system				
Туре	Hydraulic with independent left/right adjustable computer control			
Tyres				
Drive wheels	23.1-26 bias turf (R3), 23.1-26 radial turf (R3), 620/75R26 radial bar (R1)			
Tail wheels	16.1-16.5L, 10-ply implement rib			

DRAPER HEAD MODEL	5400-25	5400-30	5400-35	5400-40	
<b>Header Specifications</b>					
Drive	Dual Hydraulic				
Header angle	4-18 degrees				
Flotation	Hydraulic (on tractor)				
Draper opening (m)	2
