

Komplete™

5% Nitrogen, 15% Phosphorus, 35% Potassium +
Organocatalyst's

WHAT IS KOMplete™?

Specially balanced potassium concentrate, to improve overall plant metabolism. Potassium is an essential element for photosynthesis, protein synthesis, nutrient balance, water use and transport and activates over 60 enzymes involved in plant growth.

Komplete™ is highly effective due to its high potassium analysis, balanced with phosphate for energy, as well as urea and organic catalysts for uptake and efficient metabolism.

Plants deficient in potassium are less resistant to drought, excess water, and high and low temperatures. They are also less resistant to pests, diseases and nematode attacks.

Potassium is also known as the quality nutrient because of its important effects on quality factors such as size, shape, colour, taste, shelf life, fibre quality and other quality measurements.

BENEFITS

- High analysis - 55% of contents are actual nutrients.
- Complete package for wide variety of crops, application methods and soil types.
- Improves drought tolerance.
- Improves plant resistance to pest attack.
- Increases quality of produce.
