6. ACCIDENTAL RELEASE MEASURES

PERSONAL PRECAUTIONS	Wear SWA approved self-contained breathing apparatus and full protective clothing. For further details refer to section 8.
ENVIRONMENTAL PRECAUTIONS	In the event of a major spill, prevent spillage from entering drains or water courses. Spills to soil or similar surface may necessitate removal of top soil. The affected area should be placed in appropriate container for disposal
CONTAINMENT AND CLEANING	Clean up all spills immediately. Stop leak if safe to do so and absorb spill onto sand, earth, vermiculite or some other inert absorbent material. Collect the spilled material and place into a suitable container for disposal.

7. HANDLING AND STORAGE

VENTILATION:	Ensure ventilation is adequate to maintain air concentrations below exposure standards and as low as is reasonably practicable. While good natural ventilation may be adequate in most cases, local exhaust ventilation may be required.
PERSONAL PROTECTION:	Protective equipment must be worn: PVC gloves, waterproof apron, safety boots and a full-face shield. Avoid breathing dust or vapours.
FLAMMABILITY:	Protect from heat sources as drying up of this material may release dust that can form dust explosions. Dried material may also burn like charcoal.
STORAGE AND TRANSPORT:	This is a non-dangerous good. Store away from combustible materials, food, herbicides & fungicides. Store in well-sealed container in cool dry place. Store between 4°C - 40°C
OTHER INFORMATION:	Avoid contact with acids.
