

GroPhoz™

18% Phosphorus, 3% Potassium, 14% Zinc +
Organocatalyst's

WHAT IS GROPHOZ™?

A concentrated zinc and phosphorus fertiliser to assist and maintain root development and overall plant vigour.

GroPhoz™ is a highly effective liquid source of zinc, phosphorus and organocatalysts for the correction of deficiencies and maintenance of growth in high performance food and fibre production. The nutritional elements work in concert with each other and the plants metabolism to provide the yield and quality improvement boost at the most crucial time.

Complexed with organocatalyst's, the inorganic nutrients are made more readily available to the plant for maximum uptake and efficient metabolism. GroPhoz™ offers growers consistent maximum crop improvement at early crop development & vegetative growth – the most crucial growth periods.

BENEFITS

- Highly available zinc and phosphorus
- Compatible with many chemicals for co-applications
- High analysis to save you money
- Low risk of phytotoxicity
