Subject: 4.0 Rocks!

Sunrise™ 4.0

It stomps,

It's pumped,

It rocks!

Sunrise 4.0 XA is on its way and it's bigger than any release you've seen before!

With Sunrise 4.0 XA, Eclipsys delivers its most **in-depth** advanced clinical application suite and **raises the bar** on workflow functionality.

With Sunrise 4.0 XA, Eclipsys **extends the reach, depth and usability** of its clinical solutions with the addition of features and enhancements in 16 key product areas.

What does this mean for our customers?

- A better connected enterprise:

Release 4.0 XA includes enhanced capabilities that connect all the major clinical areas in the healthcare enterprise, both on site and remote.

- Extended reach:

Built on ObjectsPlus/XA flexible architecture, 4.0 XA allows Eclipsys customers to extend our platform in new and creative ways. If they want to connect to a non-Eclipsys system, they can. If they want to connect to an outside agency's non-Eclipsys system, they can!

- Enhanced usability:

Enhancements to documentation, scheduling, patient lists and other features support ease of use, efficiency and high adoption.

How can you learn more?

Stay tuned. Starting tomorrow, every edition of Lighthouse Weekly will provide additional 4.0 XA details and updates. With such extensive enhancements, it will take **weeks** to do this release justice.

You can also look forward to another edition of Eclipsys Radio, featuring interviews with some of Eclipsys' thought leaders, to tell you more about this *pumped up* release.

When will it be available?

You might want to do an extra set of crunches on the morning of March 25. That's the release date for Sunrise 4.0 XA. You'll want to be prepared to meet a release of such awesome proportions.

What's the buzz?

Because this is such a major release, the Eclipsys Marketing group is planning to take this show on the road. Starting in early April, a small group of Eclipsys representatives will travel to media hot spots throughout the country for face-to-face meetings with key journalists and technology analysts to showcase 4.0.

The press tour will build momentum, excitement and exposure not only for the release, but for Eclipsys and its ability to deliver such an extensive release. But the news will be embargoed, meaning that those with whom we share the information are sworn to secrecy until April 21, the day Eclipsys will officially announce Sunrise 4.0 XA to the world.
