

Prodigy Bio® Peptide & Regenerative Compounds Price List

Precision. Purity. Performance.

All Prodigy Bio peptides are manufactured in the USA, sourced through FDA-registered, cGMP-compliant laboratories, and undergo rigorous identity, purity, and sterility testing.

Injectable & Reconstitutable Peptides

AOD-9604 – 10 mg

Retail: \$89 | **Provider:** \$78

A synthetic fragment of HGH studied for metabolic signaling and fat metabolism support.

ARA-290 – 16 mg

Retail: \$76 | **Provider:** \$69

A non-hematopoietic erythropoietin-derived peptide researched for tissue-protective and anti-inflammatory signaling.

Bacteriostatic Water – 10 ml / 30 ml

Retail/Provider: \$10 / \$20

USP-grade sterile diluent containing benzyl alcohol for peptide reconstitution.

BPC-157 – 5 mg / 10 mg

Retail: \$51 / \$90 | **Provider:** \$40 / \$70

A gastric pentadecapeptide studied for cellular repair, gut integrity, and soft tissue signaling.

BPC-157 / TB-500 Blend – 5/5 mg & 10/10 mg

Retail: \$89 / \$159 | **Provider:** \$65 / \$95

A synergistic blend supporting connective tissue, muscle, and recovery signaling pathways.

BPC-157 / TB-500 / KPV Blend – 10/10/10 mg

Retail: \$179 | **Provider:** \$110

Advanced multi-peptide formulation designed for inflammatory modulation and tissue repair signaling.

Cagrilintide – 10 mg

Retail: \$124 | **Provider:** \$120

An amylin analog studied for appetite regulation and metabolic signaling.

Cerebrolysin (Ampoule – 5 Pack) – 2152 mg

Provider: \$395

A neuropeptide complex researched for neurotrophic support, synaptic plasticity, and cognitive signaling.

CJC-1295 / Ipamorelin Blend – 5/5 mg

Retail: \$72 | **Provider:** \$60

A growth hormone–releasing peptide combination supporting pulsatile GH signaling.

CJC-1295 (No DAC) – 10 mg

Retail: \$85 | **Provider:** \$81

Short-acting GHRH analog for controlled GH release.

CJC-1295 (With DAC) – 2 mg

Retail: \$39 | **Provider:** \$33

Extended half-life GHRH analog for sustained GH signaling.

DSIP – 6 mg

Retail: \$39 | **Provider:** \$36

Delta sleep-inducing peptide studied for circadian rhythm and sleep regulation.

Epitalon – 50 mg

Retail: \$109 | **Provider:** \$100

A telomerase-associated peptide researched for cellular aging and longevity pathways.

GHK-Cu – 50 mg / 100 mg

Retail: \$59 / \$89 | **Provider:** \$55 / \$84

Copper peptide studied for skin regeneration, collagen signaling, and wound repair.

GHRP-2 / GHRP-6 – 10 mg

Retail: \$44 / \$29 | **Provider:** \$42 / \$27

Growth hormone secretagogues supporting appetite and GH release signaling.

Glow Blend (GHK-Cu / BPC-157 / TB-500) – 50/10/10 mg

Retail: \$149 | **Provider:** \$120

Aesthetic-focused blend designed to support skin, tissue, and recovery pathways.

Glow + KPV Blend – 50/10/10/10 mg

Retail: \$159 | Provider: \$125

Enhanced skin and inflammatory-modulation peptide formulation.

Glutathione – 600 mg

Retail: \$49 | Provider: \$29

A master antioxidant involved in detoxification and oxidative stress regulation.

Gonadorelin – 2 mg

Retail: \$59 | Provider: \$55

GnRH analog supporting LH/FSH signaling pathways.

IGF-1 LR3 – 1 mg

Retail: \$93 | Provider: \$91

Long-acting IGF-1 analog studied for cellular growth and repair signaling.

Ipamorelin – 5 mg

Retail: \$45 | Provider: \$43

Selective GH secretagogue with minimal cortisol or prolactin signaling.

Kisspeptin-10 – 5 mg

Retail: \$39 | Provider: \$35

Peptide involved in reproductive hormone signaling and HPG axis regulation.

KPV – 10 mg

Retail: \$64 | Provider: \$82

Anti-inflammatory tripeptide derived from alpha-MSH.

LL-37 – 5 mg

Retail: \$83 | **Provider:** \$79

Antimicrobial peptide studied for immune and biofilm modulation.

Melanotan I & II – 10 mg

Retail: \$49 | **Provider:** \$42

Melanocortin peptides researched for pigmentation and appetite signaling.

Methylene Blue (Ampoule – 5 Pack) – 10 mg

Provider: \$79

Redox-active compound studied for mitochondrial and cognitive signaling.

MOTS-c – 10 mg

Retail: \$79 | **Provider:** \$72

Mitochondrial-derived peptide associated with metabolic and endurance signaling.

NAD+ – 500 mg / 1000 mg

Retail: \$95 / \$180 | **Provider:** \$55 / \$75

Essential coenzyme involved in cellular energy, DNA repair, and longevity pathways.

Oxytocin – 2 mg

Retail: \$49 | **Provider:** \$44

Neuropeptide involved in bonding, mood, and autonomic regulation.

Pinealon – 20 mg

Retail/Provider: \$59

Neuroprotective peptide studied for cognitive aging and brain signaling.

PT-141 – 10 mg

Retail/Provider: \$39

Melanocortin receptor agonist studied for sexual wellness signaling.

Retatrutide (GLP-3) – 20 mg

Retail: \$234 | **Provider:** \$160

Triple agonist peptide studied for metabolic and weight regulation pathways.

Selank – 10 mg

Retail: \$49 | **Provider:** \$47

Anxiolytic peptide researched for stress and neurochemical modulation.

Semaglutide (GLP-1) – 5 mg / 10 mg

Retail: \$139 / \$169 | **Provider:** \$75 / \$110

GLP-1 receptor agonist supporting glycemic and appetite regulation.

Semax – 10 mg

Retail: \$51 | **Provider:** \$42

Nootropic peptide studied for cognitive performance and neuroplasticity.

Semax / Selank Blend – 5/5 mg

Retail: \$83 | Provider: \$73

Balanced cognitive and anxiolytic neuropeptide formulation.

Sermorelin – 10 mg

Retail: \$69 | Provider: \$59

GHRH analog supporting endogenous growth hormone production.

SS-31 – 10 mg / 25 mg

Retail: \$59 / \$121 | Provider: \$45 / \$113

Mitochondrial-targeted peptide studied for cellular energy optimization.

Tesamorelin – 10 mg

Retail: \$83 | Provider: \$65

GHRH analog studied for visceral fat and metabolic signaling.

Tesamorelin / Ipamorelin Blend – 6/2 mg & 12/4 mg

Retail: \$89 / \$169 | Provider: \$70 / \$129

Dual-pathway GH optimization blend.

Thymalin – 100 mg

Retail: \$72 | Provider: \$149

Thymic peptide studied for immune system signaling.

Thymosin Alpha-1 (TA-1) – 16 mg

Retail: \$126 | Provider: \$113

Immune-modulating peptide researched for T-cell signaling.

Thymosin Beta-4 (TB-500) – 10 mg

Retail: \$93 | **Provider:** \$79

Peptide studied for angiogenesis, muscle repair, and tissue regeneration.

Tirzepatide (GLP-2) – 12 / 30 / 60 / 72 mg

Retail: \$179–\$705 | **Provider:** \$120–\$510

Dual GIP/GLP receptor agonist studied for advanced metabolic optimization.

Capsules

BPC-157 Pro Rapid Release – 500 mcg (60 ct)

Retail: \$140 | **Provider:** \$90

Designed for fast gastrointestinal absorption and systemic signaling.

BPC-157 Pro Delayed Release – 1 mg (30 ct)

Retail: \$120 | **Provider:** \$90

Targeted delayed-release formulation for intestinal and gut-lining support.
