

LETTERS TO THE EDITOR

Take public safety seriously

Dear Editor,

The next Planning Commission meeting to voice/stop the RV park is Jan 3, at 6 pm. Please attend in person if you can at the Milton Township Offices. The developer has submitted a second Special Land Use Application which needs all our voices heard to stop possible contamination of all of our shallow wells, natural wetlands, rivers and lakes, and pollution from such a development in our small community. The addition of cars, golf carts, and people traffic crossing Torch River Road to the marina will be overwhelming and dangerous. Public safety needs to be taken seriously. Our law enforcement and first responders are too small in numbers to rapidly respond to added problems that could occur from 70 RV's and 160-plus more cars during the seasonal months. Not to mention the additional traffic from the DNR launch site at the Torch River bridge that will be additional traffic once the new parking is completed. Please check the Township website: miltontownship.org or the TESA website TESAORG.org for the Zoom link on Jan 3rd and join in.

Steve & Irene Quick, Rapid City
