

Welcome to the Stem Cell Revolution

- Most everyone wants to LOOK, FEEL, PERFORM, and LIVE YOUNGER
- Stem Cells are the key
- Stem Cells are a vital part of our immune system that repair and regenerate damaged cells
- Stem Cells are the fastest growing segment of Anti-Aging and Regenerative Health Sciences

The Problem

- The older we get, the fewer Stem Cells we have
- By age 60+ only a small % remains
- Sadly, the fewer we have... the Faster we age and the Slower we heal

What about Stem Cell Injections?

- Controversial
- No guaranteed results
- Expensive
- Can be painful
- Can be risky

Historic Breakthrough in Affordable Stem Cell Technology

- Now everyone can Look, Feel, Perform, Heal and Live Younger
- Affordable, wearable technology in patch form
- Safe, non-invasive, non-transdermal, drug-free
- A patented form of phototherapy
- Creates specific frequencies of light that increase and improve "Stem Cell Activity"

Visionary Founder & CEO... David Schmidt

- Brilliant scientist and researcher
- Genius inventor with over 100 patents and patents pending
- On the leading edge of photo-therapy research and health sciences for 20+ years
- Over 90+ clinical studies proving the efficacy of LifeWave phototherapy
- For the last 10+ years... a focus on Age-Reversal

The Company... LifeWave

- Advanced Health Sciences Research and Technology Company
- Started in 2004 based on an energy enhancing technology David Schmidt developed for Navy Seals to increase their strength, stamina and performance without drugs, stimulants or caffeine
- So effective... it is now used by world-class athletes around the world in almost every sport
- Corporate headquarters, laboratory and manufacturing in California and Ireland
- Distribution to 70+ countries from 14 Global Distribution Centers

How Does This Amazing Technology Work?

- Based on a type of light therapy called photo-biomodulation
- LifeWave patches contain very specific combinations of organic materials and nano-crystals
- When applied or near the body, they are activated by our body heat
- They begin to emit very specific wavelengths of light which stimulate targeted and beneficial biochemical and energetic responses in the body
- This is known as photo-biomodulation and is the basis for LifeWave phototherapy patches

The Sun Story

- It's a well-recognized and proven scientific principle that specific frequencies of light can cause specific changes within the body
- When we go out in the sun, a specific frequency of light causes our body to make Vitamin D
- Another frequency of sunlight (UV) causes our body to make melanin, the chemical that gives us a suntan
- LifeWave's patented technology is based on this same rock-solid scientific principle
