

Engineered for Tomorrow's drive

About Us

eJad is an emerging Automotive **Software Tier 1** supplier, an **AUTOSAR** Developing Member, and an **Eclipse SDV** Member, delivering high-quality software solutions and hardware services to the automotive industry. As a trusted partner, we manage the complete ECU life cycle according to the ASPICE process, covering various ECU applications starting from requirement gathering, platform software architecture, SW development, integration, verification, and software commissioning till system level testing and validation.

Our expertise ensures seamless integration across all vehicle domains, meeting the highest industry standards.

Software Defined Vehicle Services

- ✓ App Development in **Rust** Language
- ✓ **Velocitas** development framework tailoring
- ✓ Deployment and **Containerization** Support
- ✓ Testing in-vehicle applications within **simulated** environments
- ✓ **Docker**-based deployment, application scaling, remote updates, and performance monitoring.

Why Choose Us?

Decade of Innovation

10 years' expertise in e-mobility, ADAS, infotainment ECUs

Niche OEM Partnerships

Trusted by top German OEMs, delivering high-standard solutions

Proven ECU Expertise

Proven expertise with OEMs and Tier 1s in ECU launches

QRC² Principle Deployment

Quality, responsibility, communication, and creativity
