

Summary

Enthusiastic Software Engineering student at ASU ready to take on the extra responsibility that comes with an internship to coincide with my education, strengthen my skills, adapt to the career field of software engineering, and to never stop learning. I have my bachelors degree in Biological Sciences and a background in managing, bringing more than three years of experience driving team and organizational success. This experience reinforced my issue and conflict resolution skills, as well as process improvement and inventory control. Ultimately, this experience formed my passion for data and analytical thinking. I would love to now take this passion and apply it to a company that I can grow and succeed with.

Skills

- Data analysis
