Lifestyle Unlimited

# iLux<sup>®</sup>

## Lifestyle Unlimited

Upgrade your white-label progressive with the latest technology and grow your brand with better margins, without needing to raise your prices.

The iLux<sup>®</sup> is an evolutionary step down from the Natural Accommodation Lens (NAL<sup>®</sup>) into the world of progressive lenses. It has been developed to bring the freedom of a ultra-wide corridor, a more comfortable and faster reading area, and mitigated aberrations to the price-sensitive part of the progressive wearer market. This lens is not only less expensive but, most importantly, as good as, if not better than, the best-known PAL designs available today. It is a direct response to the growing need for flexible mobility not fulfilled by existing solutions.

The iLux<sup>®</sup> lens is processed through the optical lab like any other progressive lens. It is available in all materials with all treatments. Its design features three corridor lengths — 14, 16, and 18 millimeters — and is available in three performance options: iLux<sup>®</sup> S – Standard, non-compensated lens; iLux<sup>®</sup> M – mid-tier, compensated by default POWs; and iLux<sup>®</sup> P – Premium lens compensated by the supplied POWs.

The fitting cross for all iLux<sup>®</sup> options is located 4 mm above the PRP (Prism Reference Point). The maximum recommended add power for iLux<sup>®</sup> should not exceed 4.00.
