

Coronavirus Social Story

Germs are all around us. Some germs make people sick. Some germs are called viruses.

Coronavirus is a type of virus. You have probably heard about it on T.V. or from other people. Coronavirus can make people sick.

People can help stop sickness by washing their hands and staying home. That is why a lot of schools are closing.

When school is closed, I will not be able to go to school. I will not see my teacher or my friends in person. This may make me feel sad or angry.

If I feel sad or angry at home, I can stay calm by taking deep breaths or choosing an activity to do.

Some activities I can do while school is closed are reading books, playing games, watching videos, and talking to my family.

I may be scared that school will be closed forever. I can remember that school is not closed forever. School will start again soon but right now I have to wait.

School will stay closed for a while to keep everybody safe and healthy. It is good to be safe and healthy!

When school starts again, I will see my teachers and friends. We will be happy that we are safe and healthy!
