

5th Edition Task List

Section B

Printing Guide

Practice Test: pages 3-13

Answer Key: pages 14-24

Studying Data Sheets: pages 25-34

Task Cards: pages 35-50

AllDayABA Mock Questions: Section B

Name: _____ Date: _____

Directions: Read each question carefully and circle the best answer.

B1-Q1

A dog is a living organism. If it gets fleas, it scratches itself. Scratching alters the environment the dog lives in. Scratching is a(n)...

- a. Punisher
- b. Generalizer
- c. Response class
- d. Behavior

B1-Q2

A specific occurrence of a behavior is known as a what?

- a. Reinforcer
- b. Response
- c. Consequence
- d. Punisher

B1-Q3

Ripping up paper to avoid working on homework and laying on the ground to avoid working on homework are part of the same:

- a. Stimulus class
- b. Reinforcement class
- c. Response class
- d. Punishment class

B2-Q1

A change in energy which has an effect on one or more of the senses of a living creature is known as a what?

- a. Response
- b. Behavior
- c. Motivator
- d. Stimulus

B2-Q2

Knives, forks, and spoons all share the commonality of moving food around. Utensils would be a _____.

- a. Stimulus class
- b. Motivating operation
- c. Response class
- d. Conditioned reinforcer

B3-Q1

Pavlov's dogs salivating at the sound of a bell demonstrates what type of conditioning?

- a. Respondent conditioning
- b. Neutral conditioning
- c. Operant conditioning
- d. Transformative conditioning

B3-Q2

Brian is working to increase his number of steps he takes each day. His wife rewards him with a piece of chocolate after every 10,000 steps. This demonstrates...

- a. Operant conditioning
- b. Respondent conditioning
- c. Unconditioned stimuli
- d. Conditioned punishment

B4-Q1

Giving your dog a treat to increase the frequency that he will urinate outside is an example of what?

- a. Positive punishment
- b. Positive reinforcement
- c. Negative punishment
- d. Negative reinforcement

B4-Q2

I have a headache, so I take a pain reliever. The headache goes away. In the future, I am more likely to take a pain reliever again when I feel a headache. What does the pain reliever serve as?

- a. Positive punishment
- b. Positive reinforcement
- c. Negative punishment
- d. Negative reinforcement

B5-Q1

Every two weeks, Suzanne receives a paycheck for the work she does at her company. This is an example of what schedule of reinforcement?

- a. Fixed ratio
- b. Concurrent
- c. Progressive
- d. Fixed interval

B5-Q2

Jeanie gives her daughter \$10 for every 10 times that she does the dishes. What schedule of reinforcement is this?

- a. Variable ratio
- b. Variable interval
- c. Fixed interval
- d. Fixed ratio

B5-Q3

A sea lion is given a treat after an average of 3 minutes remaining on a mat to improve veterinary care. On which schedule of reinforcement is the sea lion?

- a. Variable interval
- b. Tandem
- c. Extinction
- d. Fixed ratio

B5-Q4

Slot machines are an example of what type of schedule of reinforcement?

- a. Fixed interval
- b. Extinction
- c. Variable ratio
- d. Social

B5-Q5

A math teacher lets the class have a break after they complete 5 class-wide questions or 15 minutes have passed, whichever comes first. This is what kind of reinforcement schedule?

- a. Fixed ratio
- b. Alternative
- c. Chained
- d. Progressive

B5-Q6

Chained, mixed, and tandem are all types of what schedule of reinforcement?

- a. Motivating
- b. Singular
- c. Compound
- d. Variable ratio

B5-Q7

Which schedule of reinforcement has two or more contingencies acting simultaneously or independently for two or more behaviors?

- a. Alternative
- b. Chained
- c. Progressive
- d. Concurrent

B5-Q8

Ellie gets to put a sticker on her potty chart after she uses the restroom at least 3 times during the day and stays dry for at least 5 hours. Identify the schedule of reinforcement in effect.

- a. Conjunctive
- b. Fixed interval
- c. Fixed ratio
- d. Alternative

B5-Q9

What schedule involves withholding reinforcement in the presence of a particular behavior with the goal of eliminating the behavior altogether?

- a. Multiple
- b. Extinction
- c. Conjunctive
- d. Mixed

B5-Q10

When you bake brownies, you must complete the steps in order and be successful in doing them in order to be able to eat them at the end. This demonstrates which schedule of reinforcement?

- a. Fixed interval
- b. Chained
- c. Fixed ratio
- d. Compound

B5-Q11

A researcher is running an experiment on the effect of a randomly implemented FR3/VR7 schedule of reinforcement on a rat's lever-pushing behavior. What type of schedule is this?

- a. Progressive
- b. Extinction
- c. Mixed
- d. Unconditioned

B5-Q12

A doctor is on call for the weekend and is on two unique reinforcement schedules based on location (home vs. work). Which schedule of reinforcement is the doctor on?

- a. Tandem
- b. Multiple
- c. Chained
- d. Variable ratio

B5-Q13

Under which schedule of reinforcement is reinforcement thinned systematically after each presentation of reinforcement regardless of the individual's response(s) / behavior(s)?

- a. Discriminative
- b. Progressive
- c. Chained
- d. Concurrent

B5-Q14

In the movie *Gravity*, Sandra Bullock completes a variety of tasks to get to safety without knowing if or when she will make it to safety. This follows which schedule of reinforcement?

- a. Discriminative
- b. Tandem
- c. Conjunctive
- d. Chained

B5-Q15

Which type of reinforcement schedule involves a "signal" that a particular schedule is in effect?

- a. Fixed
- b. Nondiscriminative
- c. Variable
- d. Discriminative

B5-Q16

If researchers keep the schedule of reinforcement that is currently in effect a secret (i.e. there is no "signal"), which type of schedule are they using?

- a. Ratio
- b. Discriminative
- c. Nondiscriminative
- d. Interval

B6-Q1

The addition of a stimulus which decreases the likelihood that a behavior will occur again in the future is known as...

- a. Negative reinforcement
- b. Negative punishment
- c. Positive reinforcement
- d. Positive punishment

B6-Q2

Sally's mom grounds her from going to a party due to her skipping class. Getting grounded is a form of what?

- a. Negative reinforcement
- b. Negative punishment
- c. Positive reinforcement
- d. Positive punishment

B7-Q1

If reinforcement is not mediated by another person then it is what type of reinforcement?

- a. Socially mediated
- b. Automatic
- c. Discriminative
- d. Nondiscriminative

B7-Q2

If reinforcement is mediated by another person then it is what type of reinforcement?

- a. Socially mediated
- b. Automatic
- c. Discriminative
- d. Nondiscriminative

B8-Q1

Food, water, and sleep are all examples of what?

- a. Automatic reinforcers
- b. Socially mediated reinforcers
- c. Conditioned reinforcers
- d. Unconditioned reinforcers

B8-Q2

Miranda finds reading a book relaxing. She has learned that over time. What category do books fit in for her?

- a. Unconditioned reinforcer
- b. Conditioned reinforcer
- c. Generalized reinforcer
- d. Social reinforcer

B8-Q3

Money has become a reinforcer in society. It has a history of being paired with food, water, fun activities, gifts, and more. It is a..

- a. Generalized reinforcer
- b. Unconditioned reinforcer
- c. Socially mediated reinforcer
- d. Conditioned reinforcer

B8-Q4

Titus gets stung by a bee while playing in a field. He is less likely to play in that field now. The pain from getting stung is a(n)...

- a. Unconditioned reinforcer
- b. Conditioned reinforcer
- c. Unconditioned punisher
- d. Conditioned punisher

B8-Q5

A stimulus that acts as punishment because of an individual's learning history is a what?

- a. Unconditioned punisher
- b. Conditioned punisher
- c. Automatic punisher
- d. Generalized punisher

B8-Q6

When Kayla was in first grade, she disliked the behavior management "stoplight" in the classroom because it was paired with loss of recess, notes home, and other consequences. The stoplight served as a(n)...

- a. Unconditioned punisher
- b. Conditioned punisher
- c. Automatic punisher
- d. Generalized punisher

B9-Q1

Which process decreases a behavior entirely by withholding reinforcement in the presence of that behavior?

- a. Operant extinction
- b. Automatic extinction
- c. Generalized extinction
- d. Respondent extinction

B10-Q1

What occurs when a response is affected by the presence or absence of a stimulus?

- a. Stimulus control
- b. Response control
- c. Functional relation
- d. Motivating relation

B11-Q1

Kennedy can identify the color orange when presented with an array of ten colors. She has demonstrated...

- a. Discrimination
- b. Discernment
- c. Decipherment
- d. Decryption

B11-Q2

Bobby learned how to use a cash register at his first job. He continues to be able to use the cash register at his second one. What is this an example of?

- a. Stimulus control
- b. Generalization
- c. Discrimination
- d. Reinforcement

B11-Q3

When researchers come back and check whether the effect on the dependent variable has lasted even after an intervention is withdrawn, they are assessing:

- a. Continuance
- b. Maintenance
- c. Multiple exemplars
- d. Motivation

B12-Q1

Level of thirst will increase or decrease the effectiveness of water as a reinforcer; therefore, thirst is an example of a what?

- a. Discriminative stimulus
- b. Motivating operation
- c. Contingency
- d. Continuous behavior

B12-Q2

Feeling lonely will increase the effectiveness of social interactions as a reinforcer. Feeling lonely is an example of a(n)...

- a. Reinforcing operation
- b. Establishing operation
- c. Increasing operation
- d. Abolishing operation

B-12Q3

Dale ate several bags of mini M&Ms before a trivia night. M&Ms will no longer be as effective of a reinforcer for him. In this instance, feeling full is a(n)...

- a. Abolishing operation
- b. Establishing operation
- c. Punishing operation
- d. Functional operation

B12-Q4

Sleep, pain, food, and water are all examples of what?

- a. CMO
- b. AO
- c. UMO
- d. EO

B12-Q5

This is a type of motivating operation with a value-altering effect that occurs because of a learning history:

- a. UMO
- b. EO
- c. CMO
- d. AO

B12-Q6

Your toilet will not flush which makes finding a plunger more reinforcing. Which option best describes this scenario?

- a. SD
- b. CMO-T
- c. FR1
- d. AO

B12-Q7

Seeing the temperature on your weather app alters the reinforcing value of different types of clothing. This demonstrates...

- a. CMO-S
- b. EO
- c. UMO
- d. VR1

B12-Q8

Which option best describes the following scenario: My cat hides away when he sees the pet carrier come out because he associates it with going to the vet.

- a. AO
- b. Punishment
- c. CMO-R
- d. CMO-T

B13-Q1

You have been taught that if you steal a cute pair of shoes from your favorite store, you will be faced with jail time and/or a fine. What is this called?

- a. Contingency-shaped behavior
- b. Motivating operation
- c. Derived stimulus relation
- d. Rule-governed behavior

B13-Q2

As a toddler, you poked an ant hill. You then received a painful bite from one of the ants. You now no longer poke ant hills. What is this called?

- a. Contingency-shaped behavior
- b. Motivating operation
- c. Derived stimulus relation
- d. Rule-governed behavior

B14-Q1

Units of verbal behavior which functionally relate responses to the variables that control them are known as...

- a. Verbal operants
- b. Operational definitions
- c. Motivating operations
- d. Consequence operants

B14-Q2

This is any behavior that is reinforced by another individual's behavior.

- a. Rule-governed behavior
- b. Verbal behavior
- c. Behavioral consequences
- d. Positive reinforcement

B14-Q3

"What time is the movie?" is an example of a _____ for information.

- a. Function
- b. Transcription
- c. Tact
- d. Mand

B14-Q4

A child is looking out the window of a vehicle and says, "There is the St. Louis Arch!" Their mother then says, "Sure is." Which verbal operant is demonstrated?

- a. Echoic
- b. Tact
- c. Textual
- d. Mand

B14-Q5

I sing, "Mary had a..." and my daughter finishes with, "Little lamb." This would be an example of:

- a. Intraverbal
- b. Echoic
- c. Transitivity
- d. Copying a text

B14-Q6

A speech-language pathologist tells a learner, "Show me the dog." The learner says, "Show me the dog." Which of the following verbal operants has occurred?

- a. Tact
- b. Transcription
- c. Echoic
- d. Intraverbal

B14-Q7

A professor asks a student in the front row to read a particular paragraph from the textbook. The student does as requested. The student has engaged in what type of behavior?

- a. Intraverbal
- b. Textual
- c. Copying a text
- d. Transcription

B14-Q8

A kindergarten teacher has her students complete weekly spelling tests in which she reads aloud a set of words and has the students write down what they hear. Which verbal operant is this?

- a. Transcription
- b. Mand
- c. Copying a text
- d. Tact

B14-Q9

What is a type of echoic behavior that involves writing down what is read?

- a. Copying a text
- b. Stimulus relation
- c. Functional equivalence
- d. Intraverbal

B15-Q1

Transitivity, symmetry, and reflexivity are all examples of what?

- a. Stimulus classes
- b. Verbal operants
- c. Response classes
- d. Derived stimulus relations

B15-Q2

Correctly responding to stimulus-stimulus relations that have not been trained or reinforced is known as _____.

- a. Echoing
- b. Latency
- c. Reversal design
- d. Equivalence

B15-Q3

Ian is taught to match a picture of a German shepherd to the word "dog". He then is taught to match the word "dog" to a picture of a pug. Ian then successfully matches the pictures of both breeds together without any teaching. What is this called?

- a. Reflexivity
- b. Symmetry
- c. Transitivity
- d. None of the above

B15-Q4

A preschool-aged child has duplicated number flashcards laid out in front of them. They start matching them together even though they have never been taught how to do this. This child has demonstrated...

- a. Reflexivity
- b. Symmetry
- c. Transitivity
- d. None of the above

B15-Q5

A kindergarten student is taught to match the numerical form of "1" with the word "one". Later in the day, the match the word "one" with the numerical "1". They have engaged in _____.

- a. Reflexivity
- b. Symmetry
- c. Transitivity
- d. None of the above

AllDayABA Mock Questions: ANSWER KEY Section B

Name: _____ Date: _____

Directions: Read each question carefully and circle the best answer.

B1-Q1

A dog is a living organism. If it gets fleas, it scratches itself. Scratching alters the environment the dog lives in. Scratching is a(n)...

- a. Punisher
- b. Generalizer
- c. Response class
- d. Behavior

B1-Q2

A specific occurrence of a behavior is known as a what?

- a. Reinforcer
- b. Response
- c. Consequence
- d. Punisher

B1-Q3

Ripping up paper to avoid working on homework and laying on the ground to avoid working on homework are part of the same:

- a. Stimulus class
- b. Reinforcement class
- c. Response class
- d. Punishment class

B2-Q1

A change in energy which has an effect on one or more of the senses of a living creature is known as a what?

- a. Response
- b. Behavior
- c. Motivator
- d. Stimulus

B2-Q2

Knives, forks, and spoons all share the commonality of moving food around. Utensils would be a _____.

- a. Stimulus class
- b. Motivating operation
- c. Response class
- d. Conditioned reinforcer

B3-Q1

Pavlov's dogs salivating at the sound of a bell demonstrates what type of conditioning?

- a. Respondent conditioning
- b. Neutral conditioning
- c. Operant conditioning
- d. Transformative conditioning

B3-Q2

Brian is working to increase his number of steps he takes each day. His wife rewards him with a piece of chocolate after every 10,000 steps. This demonstrates...

- a. Operant conditioning
- b. Respondent conditioning
- c. Unconditioned stimuli
- d. Conditioned punishment

B4-Q1

Giving your dog a treat to increase the frequency that he will urinate outside is an example of what?

- a. Positive punishment
- b. Positive reinforcement
- c. Negative punishment
- d. Negative reinforcement

B4-Q2

I have a headache, so I take a pain reliever. The headache goes away. In the future, I am more likely to take a pain reliever again when I feel a headache. What does the pain reliever serve as?

- a. Positive punishment
- b. Positive reinforcement
- c. Negative punishment
- d. Negative reinforcement

B5-Q1

Every two weeks, Suzanne receives a paycheck for the work she does at her company. This is an example of what schedule of reinforcement?

- a. Fixed ratio
- b. Concurrent
- c. Progressive
- d. Fixed interval

B5-Q2

Jeanie gives her daughter \$10 for every 10 times that she does the dishes. What schedule of reinforcement is this?

- a. Variable ratio
- b. Variable interval
- c. Fixed interval
- d. Fixed ratio

B5-Q3

A sea lion is given a treat after an average of 3 minutes remaining on a mat to improve veterinary care. On which schedule of reinforcement is the sea lion?

- a. Variable interval
- b. Tandem
- c. Extinction
- d. Fixed ratio

B5-Q4

Slot machines are an example of what type of schedule of reinforcement?

- a. Fixed interval
- b. Extinction
- c. Variable ratio
- d. Social

B5-Q5

A math teacher lets the class have a break after they complete 5 class-wide questions or 15 minutes have passed, whichever comes first. This is what kind of reinforcement schedule?

- a. Fixed ratio
- b. Alternative
- c. Chained
- d. Progressive

B5-Q6

Chained, mixed, and tandem are all types of what schedule of reinforcement?

- a. Motivating
- b. Singular
- c. Compound
- d. Variable ratio

B5-Q7

Which schedule of reinforcement has two or more contingencies acting simultaneously or independently for two or more behaviors?

- a. Alternative
- b. Chained
- c. Progressive
- d. Concurrent

B5-Q8

Ellie gets to put a sticker on her potty chart after she uses the restroom at least 3 times during the day and stays dry for at least 5 hours. Identify the schedule of reinforcement in effect.

- a. Conjunctive
- b. Fixed interval
- c. Fixed ratio
- d. Alternative

B5-Q9

What schedule involves withholding reinforcement in the presence of a particular behavior with the goal of eliminating the behavior altogether?

- a. Multiple
- b. Extinction
- c. Conjunctive
- d. Mixed

B5-Q10

When you bake brownies, you must complete the steps in order and be successful in doing them in order to be able to eat them at the end. This demonstrates which schedule of reinforcement?

- a. Fixed interval
- b. Chained
- c. Fixed ratio
- d. Compound

B5-Q11

A researcher is running an experiment on the effect of a randomly implemented FR3/VR7 schedule of reinforcement on a rat's lever-pushing behavior. What type of schedule is this?

- a. Progressive
- b. Extinction
- c. Mixed
- d. Unconditioned

B5-Q12

A doctor is on call for the weekend and is on two unique reinforcement schedules based on location (home vs. work). Which schedule of reinforcement is the doctor on?

- a. Tandem
- b. Multiple
- c. Chained
- d. Variable ratio

B5-Q13

Under which schedule of reinforcement is reinforcement thinned systematically after each presentation of reinforcement regardless of the individual's response(s) / behavior(s)?

- a. Discriminative
- b. Progressive
- c. Chained
- d. Concurrent

B5-Q14

In the movie *Gravity*, Sandra Bullock completes a variety of tasks to get to safety without knowing if or when she will make it to safety. This follows which schedule of reinforcement?

- a. Discriminative
- b. Tandem
- c. Conjunctive
- d. Chained

B5-Q15

Which type of reinforcement schedule involves a "signal" that a particular schedule is in effect?

- a. Fixed
- b. Nondiscriminative
- c. Variable
- d. Discriminative

B5-Q16

If researchers keep the schedule of reinforcement that is currently in effect a secret (i.e. there is no "signal"), which type of schedule are they using?

- a. Ratio
- b. Discriminative
- c. Nondiscriminative
- d. Interval

B6-Q1

The addition of a stimulus which decreases the likelihood that a behavior will occur again in the future is known as...

- a. Negative reinforcement
- b. Negative punishment
- c. Positive reinforcement
- d. Positive punishment

B6-Q2

Sally's mom grounds her from going to a party due to her skipping class. Getting grounded is a form of what?

- a. Negative reinforcement
- b. Negative punishment
- c. Positive reinforcement
- d. Positive punishment

B7-Q1

If reinforcement is not mediated by another person then it is what type of reinforcement?

- a. Socially mediated
- b. Automatic
- c. Discriminative
- d. Nondiscriminative

B7-Q2

If reinforcement is mediated by another person then it is what type of reinforcement?

- a. Socially mediated
- b. Automatic
- c. Discriminative
- d. Nondiscriminative

B8-Q1

Food, water, and sleep are all examples of what?

- a. Automatic reinforcers
- b. Socially mediated reinforcers
- c. Conditioned reinforcers
- d. Unconditioned reinforcers

B8-Q2

Miranda finds reading a book relaxing. She has learned that over time. What category do books fit in for her?

- a. Unconditioned reinforcer
- b. Conditioned reinforcer
- c. Generalized reinforcer
- d. Social reinforcer

B8-Q3

Money has become a reinforcer in society. It has a history of being paired with food, water, fun activities, gifts, and more. It is a..

- a. Generalized reinforcer
- b. Unconditioned reinforcer
- c. Socially mediated reinforcer
- d. Conditioned reinforcer

B8-Q4

Titus gets stung by a bee while playing in a field. He is less likely to play in that field now. The pain from getting stung is a(n)...

- a. Unconditioned reinforcer
- b. Conditioned reinforcer
- c. Unconditioned punisher
- d. Conditioned punisher

B8-Q5

A stimulus that acts as punishment because of an individual's learning history is a what?

- a. Unconditioned punisher
- b. Conditioned punisher
- c. Automatic punisher
- d. Generalized punisher

B8-Q6

When Kayla was in first grade, she disliked the behavior management "stoplight" in the classroom because it was paired with loss of recess, notes home, and other consequences. The stoplight served as a(n)...

- a. Unconditioned punisher
- b. Conditioned punisher
- c. Automatic punisher
- d. Generalized punisher

B9-Q1

Which process decreases a behavior entirely by withholding reinforcement in the presence of that behavior?

- a. Operant extinction
- b. Automatic extinction
- c. Generalized extinction
- d. Respondent extinction

B10-Q1

What occurs when a response is affected by the presence or absence of a stimulus?

- a. Stimulus control
- b. Response control
- c. Functional relation
- d. Motivating relation

B11-Q1

Kennedy can identify the color orange when presented with an array of ten colors. She has demonstrated...

- a. Discrimination
- b. Discernment
- c. Decipherment
- d. Decryption

B11-Q2

Bobby learned how to use a cash register at his first job. He continues to be able to use the cash register at his second one. What is this an example of?

- a. Stimulus control
- b. Generalization
- c. Discrimination
- d. Reinforcement

B11-Q3

When researchers come back and check whether the effect on the dependent variable has lasted even after an intervention is withdrawn, they are assessing:

- a. Continuance
- b. Maintenance
- c. Multiple exemplars
- d. Motivation

B12-Q1

Level of thirst will increase or decrease the effectiveness of water as a reinforcer; therefore, thirst is an example of a what?

- a. Discriminative stimulus
- b. Motivating operation
- c. Contingency
- d. Continuous behavior

B12-Q2

Feeling lonely will increase the effectiveness of social interactions as a reinforcer. Feeling lonely is an example of a(n)...

- a. Reinforcing operation
- b. Establishing operation**
- c. Increasing operation
- d. Abolishing operation

B-12Q3

Dale ate several bags of mini M&Ms before a trivia night. M&Ms will no longer be as effective of a reinforcer for him. In this instance, feeling full is a(n)...

- a. Abolishing operation**
- b. Establishing operation
- c. Punishing operation
- d. Functional operation

B12-Q4

Sleep, pain, food, and water are all examples of what?

- a. CMO
- b. AO
- c. UMO**
- d. EO

B12-Q5

This is a type of motivating operation with a value-altering effect that occurs because of a learning history:

- a. UMO
- b. EO
- c. CMO**
- d. AO

B12-Q6

Your toilet will not flush which makes finding a plunger more reinforcing. Which option best describes this scenario?

- a. SD
- b. CMO-T**
- c. FR1
- d. AO

B12-Q7

Seeing the temperature on your weather app alters the reinforcing value of different types of clothing. This demonstrates...

- a. CMO-S**
- b. EO
- c. UMO
- d. VR1

B12-Q8

Which option best describes the following scenario: My cat hides away when he sees the pet carrier come out because he associates it with going to the vet.

- a. AO
- b. Punishment
- c. CMO-R
- d. CMO-T

B13-Q1

You have been taught that if you steal a cute pair of shoes from your favorite store, you will be faced with jail time and/or a fine. What is this called?

- a. Contingency-shaped behavior
- b. Motivating operation
- c. Derived stimulus relation
- d. Rule-governed behavior

B13-Q2

As a toddler, you poked an ant hill. You then received a painful bite from one of the ants. You now no longer poke ant hills. What is this called?

- a. Contingency-shaped behavior
- b. Motivating operation
- c. Derived stimulus relation
- d. Rule-governed behavior

B14-Q1

Units of verbal behavior which functionally relate responses to the variables that control them are known as...

- a. Verbal operants
- b. Operational definitions
- c. Motivating operations
- d. Consequence operants

B14-Q2

This is any behavior that is reinforced by another individual's behavior.

- a. Rule-governed behavior
- b. Verbal behavior
- c. Behavioral consequences
- d. Positive reinforcement

B14-Q3

"What time is the movie?" is an example of a _____ for information.

- a. Function
- b. Transcription
- c. Tact
- d. Mand

B14-Q4

A child is looking out the window of a vehicle and says, "There is the St. Louis Arch!" Their mother then says, "Sure is." Which verbal operant is demonstrated?

- a. Echoic
- b. Tact**
- c. Textual
- d. Mand

B14-Q5

I sing, "Mary had a..." and my daughter finishes with, "Little lamb." This would be an example of:

- a. Intraverbal**
- b. Echoic
- c. Transitivity
- d. Copying a text

B14-Q6

A speech-language pathologist tells a learner, "Show me the dog." The learner says, "Show me the dog." Which of the following verbal operants has occurred?

- a. Tact
- b. Transcription
- c. Echoic**
- d. Intraverbal

B14-Q7

A professor asks a student in the front row to read a particular paragraph from the textbook. The student does as requested. The student has engaged in what type of behavior?

- a. Intraverbal
- b. Textual**
- c. Copying a text
- d. Transcription

B14-Q8

A kindergarten teacher has her students complete weekly spelling tests in which she reads aloud a set of words and has the students write down what they hear. Which verbal operant is this?

- a. Transcription**
- b. Mand
- c. Copying a text
- d. Tact

B14-Q9

What is a type of echoic behavior that involves writing down what is read?

- a. Copying a text**
- b. Stimulus relation
- c. Functional equivalence
- d. Intraverbal

B15-Q1

Transitivity, symmetry, and reflexivity are all examples of what?

- a. Stimulus classes
- b. Verbal operants
- c. Response classes
- d. Derived stimulus relations

B15-Q2

Correctly responding to stimulus-stimulus relations that have not been trained or reinforced is known as _____.

- a. Echoing
- b. Latency
- c. Reversal design
- d. Equivalence

B15-Q3

Ian is taught to match a picture of a German shepherd to the word "dog". He then is taught to match the word "dog" to a picture of a pug. Ian then successfully matches the pictures of both breeds together without any teaching. What is this called?

- a. Reflexivity
- b. Symmetry
- c. Transitivity
- d. None of the above

B15-Q4

A preschool-aged child has duplicated number flashcards laid out in front of them. They start matching them together even though they have never been taught how to do this. This child has demonstrated...

- a. Reflexivity
- b. Symmetry
- c. Transitivity
- d. None of the above

B15-Q5

A kindergarten student is taught to match the numerical form of "1" with the word "one". Later in the day, they match the word "one" with the numerical "1". They have engaged in _____.

- a. Reflexivity
- b. Symmetry
- c. Transitivity
- d. None of the above

Name: _____ Date: _____

Mock Questions Studying Data Sheets: Section B

Code	Question	Answer (Written)	Answer (Letter)	Correct	Incorrect	Other Notes
B1-Q1	A dog is a living organism. If it gets fleas, it scratches itself. Scratching alters the environment the dog lives in. Scratching is a(n)...	behavior	D			
B1-Q2	A specific occurrence of a behavior is known as a what?	response	B			
B1-Q3	Ripping up paper to avoid working on homework and laying on the ground to avoid working on homework are part of the same:	response class	C			
B2-Q1	A change in energy which has an effect on one or more of the senses of a living creature is known as a what?	stimulus	D			
B2-Q2	Knives, forks, and spoons all share the commonality of moving food around. Utensils would be a _____. _____.	stimulus class	A			
B3-Q1	Pavlov's dogs salivating at the sound of a bell demonstrates what type of conditioning?	respondent conditioning	A			
B3-Q2	Brian is working to increase his number of steps he takes each day. His wife rewards him with a piece of chocolate after every 10,000 steps. This demonstrates...	operant conditioning	A			

Name: _____ Date: _____

Mock Questions Studying Data Sheets: Section B

Code	Question	Answer (Written)	Answer (Letter)	Correct	Incorrect	Other Notes
B4-Q1	Giving your dog a treat to increase the frequency that he will urinate outside is an example of what?	positive reinforcement	B			
B4-Q2	I have a headache, so I take a pain reliever. The headache goes away. In the future, I am more likely to take a pain reliever again when I feel a headache. What does the pain reliever serve as?	negative reinforcement	D			
B5-Q1	Every two weeks, Suzanne receives a paycheck for the work she does at her company. This is an example of what schedule of reinforcement?	fixed interval	D			
B5-Q2	Jeanie gives her daughter \$10 for every 10 times that she does the dishes. What schedule of reinforcement is this?	fixed ratio	D			
B5-Q3	A sea lion is given a treat after an average of 3 minutes remaining on a mat to improve veterinary care. On which schedule of reinforcement is the sea lion?	variable interval	A			
B5-Q4	Slot machines are an example of what type of schedule of reinforcement?	variable ratio	C			

Name: _____ Date: _____

Mock Questions Studying Data Sheets: Section B

Code	Question	Answer (Written)	Answer (Letter)	Correct	Incorrect	Other Notes
B5-Q5	A math teacher lets the class have a break after they complete 5 class-wide questions or 15 minutes have passed, whichever comes first. This is what kind of reinforcement schedule?	alternative	B			
B5-Q6	Chained, mixed, and tandem are all types of what schedule of reinforcement?	compound	C			
B5-Q7	Which schedule of reinforcement has two or more contingencies acting simultaneously or independently for two or more behaviors?	concurrent	D			
B5-Q8	Ellie gets to put a sticker on her potty chart after she uses the restroom at least 3 times during the day and stays dry for at least 5 hours. Identify the schedule of reinforcement in effect.	conjunctive	A			
B5-Q9	What schedule involves withholding reinforcement in the presence of a particular behavior with the goal of eliminating the behavior altogether?	extinction	B			
B5-Q10	When you bake brownies, you must complete the steps in order and be successful in doing them in order to be able to eat them at the end. This demonstrates which schedule of reinforcement?	chained	B			

Name: _____ Date: _____

Mock Questions Studying Data Sheets: Section B

Code	Question	Answer (Written)	Answer (Letter)	Correct	Incorrect	Other Notes
B5-Q11	A researcher is running an experiment on the effect of a randomly implemented FR3/VR7 schedule of reinforcement on a rat's lever-pushing behavior. What type of schedule is this?	mixed	C			
B5-Q12	A doctor is on call for the weekend and is on two unique reinforcement schedules based on location (home vs. work). Which schedule of reinforcement is the doctor on?	multiple	B			
B5-Q13	Under which schedule of reinforcement is reinforcement thinned systematically after each presentation of reinforcement regardless of the individual's response(s) / behavior(s)?	progressive	B			
B5-Q14	In the movie <i>Gravity</i> , Sandra Bullock completes a variety of tasks to get to safety without knowing if or when she will make it to safety. This follows which schedule of reinforcement?	tandem	B			
B5-Q15	Which type of reinforcement schedule involves a "signal" that a particular schedule is in effect?	discriminative	D

B15-Q5	A kindergarten student is taught to match the numerical form of "1" with the word "one". Later in the day, they match the word "one" with the numerical "1". They have engaged in _____.	symmetry	B			

B-1 Question 1

A dog is a living organism. If it gets fleas, it scratches itself. Scratching alters the environment the dog lives in. Scratching is a(n)...

- A. punisher
- B. generalizer
- C. response class
- D. behavior

Copyright © 2022 AllDayABA

B-1 Question 2

A specific occurrence of a behavior is known as a what?

- A. reinforcer
- B. response
- C. consequence
- D. punisher

Copyright © 2022 AllDayABA

B-1 Question 3

Ripping up paper to avoid working on homework and laying on the ground to avoid working on homework are part of the same:

- A. stimulus class
- B. reinforcement class
- C. response class
- D. punishment class

Copyright © 2022 AllDayABA

B-2 Question 1

A change in energy which has an effect on one or more of the senses of a living creature is known as a what?

- A. response
- B. behavior
- C. motivator
- D. stimulus

Copyright © 2022 AllDayABA

B-2 Question 2

Knives, forks, and spoons all share the commonality of moving food around. Utensils would be a _____.

- A. stimulus class
- B. motivating operation
- C. response class
- D. conditioned reinforcer

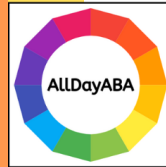

Copyright © 2022 AllDayABA

B-3 Question 1

Pavlov's dogs salivating at the sound of a bell demonstrates what type of conditioning?

- A. respondent conditioning
- B. neutral conditioning
- C. operant conditioning
- D. transformative conditioning

Copyright © 2022 AllDayABA

B-3 Question 2

Brian is working to increase his number of steps he takes each day. His wife rewards him with a piece of chocolate after every 10,000 steps. This demonstrates...

- A. operant conditioning
- B. respondent conditioning
- C. unconditioned stimuli
- D. conditioned punishment

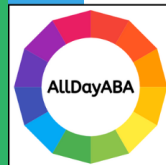

Copyright © 2022 AllDayABA

B-4 Question 1

Giving your dog a treat to increase the frequency that he will urinate outside is an example of what?

- A. positive punishment
- B. positive reinforcement
- C. negative punishment
- D. negative reinforcement

Copyright © 2022 AllDayABA

B-4 Question 2

I have a headache, so I take a pain reliever. The headache goes away. In the future, I am more likely to take a pain reliever again when I feel a headache. What does the pain reliever serve as?

- A. positive punishment
- B. positive reinforcement
- C. negative punishment
- D. negative reinforcement

Copyright © 2022 AllDayABA

B-5 Question 1

Every two weeks, Suzanne receives a paycheck for the work she does at her company. This is an example of what schedule of reinforcement?

- A. Fixed ratio
- B. Concurrent
- C. Progressive
- D. Fixed interval

Copyright © 2022 AllDayABA

B-5 Question 2

Jeanie gives her daughter \$10 for every 10 times that she does the dishes. What schedule of reinforcement is this?

- A. variable ratio
- B. variable interval
- C. fixed interval
- D. fixed ratio

Copyright © 2022 AllDayABA

B-5 Question 3

A sea lion is given a treat after an average of 3 minutes remaining on a mat to improve veterinary care. On which schedule of reinforcement is the sea lion?

- A. variable interval
- B. tandem
- C. extinction
- D. fixed ratio

Copyright © 2022 AllDayABA

B-5 Question 4

Slot machines are an example of what type of schedule of reinforcement?

- A. fixed interval
- B. extinction
- C. variable ratio
- D. social

Copyright © 2022 AllDayABA

B-5 Question 5

A math teacher lets the class have a break after they complete 5 class-wide questions or 15 minutes have passed, whichever comes first. This is what kind of reinforcement schedule?

- A. fixed ratio
- B. alternative
- C. chained
- D. progressive

Copyright © 2022 AllDayABA

B-5 Question 6

Chained, mixed, and tandem are all types of what schedule of reinforcement?

- A. motivating
- B. singular
- C. compound
- D. variable ratio

Copyright © 2022 AllDayABA

B-5 Question 7

Which schedule of reinforcement has two or more contingencies acting simultaneously or independently for two or more behaviors?

- A. alternative
- B. chained
- C. progressive
- D. concurrent

Copyright © 2022 AllDayABA

B-5 Question 8

Ellie gets to put a sticker on her potty chart after she uses the restroom at least 3 times during the day and stays dry for at least 5 hours. Identify the schedule of reinforcement in effect.

- A. conjunctive
- B. fixed interval
- C. fixed ratio
- D. alternative

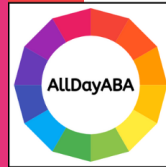

Copyright © 2022 AllDayABA

B-5 Question 9

What schedule involves withholding reinforcement in the presence of a particular behavior with the goal of eliminating the behavior altogether?

- A. multiple
- B. extinction
- C. conjunctive
- D. mixed

Copyright © 2022 AllDayABA

B-5 Question 10

When you bake brownies, you must complete the steps in order and be successful in doing them in order to be able to eat them at the end. This demonstrates which schedule of reinforcement?

- A. fixed interval
- B. chained
- C. fixed ratio
- D. compound

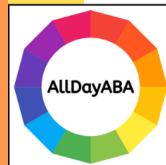

Copyright © 2022 AllDayABA

B-5 Question 11

A researcher is running an experiment on the effect of a randomly implemented FR3/VR7 schedule of reinforcement on a rat's lever-pushing behavior. What type of schedule is this?

- A. progressive
- B. extinction
- C. mixed
- D. unconditioned

Copyright © 2022 AllDayABA

B-5 Question 12

A doctor is on call for the weekend and is on two unique reinforcement schedules based on location (home vs. work). Which schedule of reinforcement is the doctor on?

- A. tandem
- B. multiple
- C. chained
- D. variable ratio

Copyright © 2022 AllDayABA

B-5 Question 13

Under which schedule of reinforcement is reinforcement thinned systematically after each presentation of reinforcement regardless of the individual's response(s) / behavior(s)?

- A. discriminative
- B. progressive
- C. chained
- D. concurrent

Copyright © 2022 AllDayABA

B-5 Question 14

In the movie *Gravity*, Sandra Bullock completes a variety of tasks to get to safety without knowing if or when she will make it to safety. This follows which schedule of reinforcement?

- A. discriminative
- B. tandem
- C. conjunctive
- D. chained

Copyright © 2022 AllDayABA

B-5 Question 15

Which type of reinforcement schedule involves a "signal" that a particular schedule is in effect?

- A. fixed
- B. nondiscriminative
- C. variable
- D. discriminative

Copyright © 2022 AllDayABA

B-5 Question 16

If researchers keep the schedule of reinforcement that is currently in effect a secret (i.e. there is no "signal"), which type of schedule are they using?

- A. ratio
- B. discriminative
- C. nondiscriminative
- D. interval

Copyright © 2022 AllDayABA

B-6 Question 1

The addition of a stimulus which decreases the likelihood that a behavior will occur again in the future is known as...

- A. negative reinforcement
- B. negative punishment
- C. positive reinforcement
- D. positive punishment

Copyright © 2022 AllDayABA

B-6 Question 2

Sally's mom grounds her from going to a party due to her skipping class. Getting grounded is a form of what?

- A. negative reinforcement
- B. negative punishment
- C. positive reinforcement
- D. positive punishment

Copyright © 2022 AllDayABA

B-7 Question 1

If reinforcement is not mediated by another person then it is what type of reinforcement?

- A. socially mediated
- B. automatic
- C. discriminative
- D. nondiscriminative

Copyright © 2022 AllDayABA

B-7 Question 2

If reinforcement is mediated by another person then it is what type of reinforcement?

- A. socially mediated
- B. automatic
- C. discriminative
- D. nondiscriminative

Copyright © 2022 AllDayABA

B-8 Question 1

Food, water, and sleep are all examples of what?

- A. automatic reinforcers
- B. socially mediated reinforcers
- C. conditioned reinforcers
- D. unconditioned reinforcers

Copyright © 2022 AllDayABA

B-8 Question 2

Miranda finds reading a book relaxing. She has learned that over time. What category do books fit in for her?

- A. unconditioned reinforcer
- B. conditioned reinforcer
- C. generalized reinforcer
- D. social reinforcer

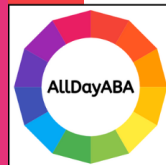

Copyright © 2022 AllDayABA

B-8 Question 3

Money has become a reinforcer in society. It has a history of being paired with food, water, fun activities, gifts, and more. It is a...

- A. generalized reinforcer
- B. unconditioned reinforcer
- C. socially mediated reinforcer
- D. conditioned reinforcer

Copyright © 2022 AllDayABA

B-8 Question 4

Titus gets stung by a bee while playing in a field. He is less likely to play in that field now. The pain from getting stung is a(n)...

- A. unconditioned reinforcer
- B. conditioned reinforcer
- C. conditioned punisher
- D. unconditioned punisher

Copyright © 2022 AllDayABA

B-8 Question 5

A stimulus that acts as punishment because of an individual's learning history is a what?

- A. unconditioned punisher
- B. conditioned punisher
- C. automatic punisher
- D. generalized punisher

Copyright © 2022 AllDayABA

B-8 Question 6

When Kayla was in first grade, she disliked the behavior management "stoplight" in the classroom because it was paired with loss of recess, notes home, and other consequences. The stoplight served as a(n)...

- A. unconditioned punisher
- B. conditioned punisher
- C. automatic punisher
- D. generalized punisher

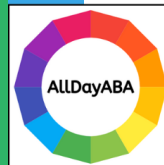

Copyright © 2022 AllDayABA

B-9 Question 1

Which process decreases a behavior entirely by withholding reinforcement in the presence of that behavior?

- A. operant extinction
- B. automatic extinction
- C. generalized extinction
- D. respondent extinction

Copyright © 2022 AllDayABA

B-10 Question 1

What occurs when a response is affected by the presence or absence of a stimulus?

- A. stimulus control
- B. response control
- C. functional relation
- D. motivating relation

Copyright © 2022 AllDayABA

B-11 Question 1

Kennedy can identify the color orange when presented with an array of ten colors. She has demonstrated...

- A. discrimination
- B. discernment
- C. decipherment
- D. decryption

Copyright © 2022 AllDayABA

B-11 Question 2

Bobby learned how to use a cash register at his first job. He continues to be able to use the cash register at his second one. What is this an example of?

- A. stimulus control
- B. generalization
- C. discrimination
- D. reinforcement

Copyright © 2022 AllDayABA

B-11 Question 3

When researchers come back and check whether the effect on the dependent variable has lasted even after an intervention is withdrawn, they are assessing:

- A. continuance
- B. maintenance
- C. multiple exemplars
- D. motivation

Copyright © 2022 AllDayABA

B-12 Question 1

Level of thirst will increase or decrease the effectiveness of water as a reinforcer; therefore, thirst is an example of a what?

- A. discriminative stimulus
- B. motivating operation
- C. contingency
- D. continuous behavior

Copyright © 2022 AllDayABA

B-12 Question 2

Feeling lonely will increase the effectiveness of social interactions as a reinforcer. Feeling lonely is an example of a(n)...

- A. reinforcing operation
- B. establishing operation
- C. increasing operation
- D. abolishing operation

Copyright © 2022 AllDayABA

B-12 Question 3

Dale ate several bags of mini M&Ms before a trivia night. M&Ms will no longer be as effective of a reinforcer for him. In this instance, feeling full is a(n)...

- A. abolishing operation
- B. establishing operation
- C. punishing operation
- D. functional operation

Copyright © 2022 AllDayABA

B-12 Question 4

Sleep, pain, food, and water are all examples of a what?

- A. CMO
- B. AO
- C. UMO
- D. EO

Copyright © 2022 AllDayABA

B-12 Question 5

This is a type of motivating operation with a value-altering effect that occurs because of a learning history:

- A. UMO
- B. EO
- C. CMO
- D. AO

Copyright © 2022 AllDayABA

B-12 Question 6

Your toilet will not flush which makes finding a plunger more reinforcing. Which option best describes this scenario?

- A. SD
- B. CMO-T
- C. FR1
- D. AO

Copyright © 2022 AllDayABA

B-12 Question 7

Seeing the temperature on your weather app alters the reinforcing value of different types of clothing. This demonstrates...

- A. CMO-S
- B. EO
- C. UMO
- D. VR1

Copyright © 2022 AllDayABA

B-12 Question 8

Which option best describes the following scenario: My cat hides away when he sees the pet carrier come out because he associates it with going to the vet.

- A. AO
- B. punishment
- C. CMO-R
- D. CMO-T

Copyright © 2022 AllDayABA

B-13 Question 1

You have been taught that if you steal a cute pair of shoes from your favorite store, you will be faced with jail time and/or a fine. What is this called?

- A. contingency-shaped behavior
- B. motivating operation
- C. derived stimulus relation
- D. rule-governed behavior

Copyright © 2022 AllDayABA

B-13 Question 2

As a toddler, you poked an ant hill. You then received a painful bite from one of the ants. You now no longer poke ant hills. What is this called?

- A. contingency-shaped behavior
- B. motivating operation
- C. derived stimulus relation
- D. rule-governed behavior

Copyright © 2022 AllDayABA

B-14 Question 1

Units of verbal behavior which functionally relate responses to the variables that control them are known as...

- A. verbal operants
- B. operational definitions
- C. motivating operations
- D. consequence operants

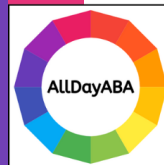

Copyright © 2022 AllDayABA

B-14 Question 2

This is any behavior that is reinforced by another individual's behavior.

- A. rule-governed behavior
- B. verbal behavior
- C. behavioral consequences
- D. positive reinforcement

Copyright © 2022 AllDayABA

B-14 Question 3

"What time is the movie?" is an example of a _____ for information.

- A. function
- B. transcription
- C. tact
- D. mand

Copyright © 2022 AllDayABA

B-14 Question 4

A child is looking out the window of a vehicle and says, "There is the St. Louis Arch!" Their mother then says, "Sure is." Which verbal operant is demonstrated?

- A. echoic
- B. tact
- C. textual
- D. mand

Copyright © 2022 AllDayABA

B-14 Question 5

I sing, "Mary had a..." and my daughter finishes with, "Little lamb." This would be an example of:

- A. intraverbal
- B. echoic
- C. transitivity
- D. copying a text

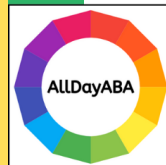

Copyright © 2022 AllDayABA

B-14 Question 6

A speech-language pathologist tells a learner, "Show me the dog." The learner says, "Show me the dog." Which of the following verbal operants has occurred?

- A. tact
- B. transcription
- C. echoic
- D. intraverbal

Copyright © 2022 AllDayABA

B-14 Question 7

A professor asks a student in the front row to read a particular paragraph from the textbook. The student does as requested. The student has engaged in what type of behavior?

- A. intraverbal
- B. textual
- C. copying a text
- D. transcription

Copyright © 2022 AllDayABA

B-14 Question 8

A kindergarten teacher has her students complete weekly spelling tests in which she reads aloud a set of words and has the students write down what they hear. Which verbal operant is this?

- A. transcription
- B. mand
- C. copying a text
- D. tact

Copyright © 2022 AllDayABA

B-14 Question 9

What is a type of echoic behavior that involves writing down what is read?

- A. copying a text
- B. stimulus relation
- C. functional equivalence
- D. intraverbal

Copyright © 2022 AllDayABA

B-15 Question 1

Transitivity, symmetry, and reflexivity are all examples of what?

- A. stimulus classes
- B. verbal operants
- C. response classes
- D. derived stimulus relations

Copyright © 2022 AllDayABA

B-15 Question 2

Correctly responding to stimulus-stimulus relations that have not been trained or reinforced is known as _____.

- A. echoing
- B. latency
- C. reversal design
- D. equivalence

Copyright © 2022 AllDayABA

B-15 Question 3

Ian is taught to match a picture of a German shepherd to the word "dog". He then is taught to match the word "dog" to a picture of a pug. Ian then successfully matches the pictures of both breeds together without any teaching. What is this called?

- A. Reflexivity
- B. Symmetry
- C. Transitivity
- D. None of the above
