

I've lived in Fountain Hills since 2001. I have been closely involved in several organizations and have had the opportunity to hear and learn what many residents think and want in their government and in their public schools. They want quality education in our schools. They want responsible spending of their tax dollars. They want transparency. They believe in our founding principles and that America is a uniquely great country. They believe in a merit-based reward system. I believe that I represent most Town residents in rejecting Critical Race Theory and concluding that DEI is not merit-based and is not a worthy or rational policy. I acknowledge that not all residents will agree with these positions, but hopefully they recognize that I don't hide what I believe, my viewpoints are readily apparent, and I respect that people can disagree. Above all, I want what is best for the Fountain Hills community, its students, its parents, and its taxpayers.
