

I believe that a strong K-12 education provides the foundation for future success and a purposeful life. This is true whether a person chooses college, seeks vocational training in a trade or technical school, or enters the military or civilian workforce directly from high school. Regardless of one's path, a love of learning and recognition of the value of lifelong learning contribute to ongoing success and personal fulfillment in our changing world. I believe in a strong education. I'm fortunate that I received one. I am a lifelong learner. You may have heard the phrase, "The questions may stay the same, but the answers change." Lifelong learning helps us manage that change. As a member of the Fountain Hills School District Governing Board since being appointed to fill a vacancy in early 2024, I strive to do my best to help the District and parents provide a strong education to and instill a desire for lifelong learning in our students. I'm fortunate to have been involved in so many educational activities and contributed my skills and experience to help others pursue and achieve their full potential. I want to continue doing that. I spend the time needed to study issues before the Board to help me reach a rational, responsible, and practical decision and vote. I support parental rights. I reject Critical Race Theory. I believe in American Greatness. I value personal responsibility and a merit-based system. DEI is not merit-based. I would be honored to continue serving this community, its students, parents, & taxpayers on the FHUSD Governing Board. I welcome your support. I encourage you to share that support with your family members, neighbors and friends. I humbly ask for your vote in the November 5 election; early voting starts October 9.
