

Certified Hospital-Based First Receivers of Victims of Mass Casualty

24 Hours / 2.5 CEU's

Course Fees: \$995.00

Note: Refresher certification is required every three years to maintain professional credential. Renewal Fee: \$150.00

Course Description

This course focuses on protection for hospital based first receivers during releases of chemicals, radiological particles, and biological agents (overt releases) that produce victims who may need decontamination prior to administration of medical care.

Although intended for mass casualty incidents as they affect emergency department personnel at fixed hospitals, the basic principles and concepts of this guidance also apply to mobile casualty care facilities and temporary shelters, such as would be necessary in the event of a catastrophic incident involving tens or hundreds of thousands of victims.

Required Texts:

OSHA Standards for General Industry (29 CFR Part 1910) current edition

Prerequisite: None

Student Learning Outcomes: At the end of the training, the participants will be able to:

Identify steps to plan for incidents involving hazardous substances.

Identify sources of exposure and hazards and suggest possible solutions.

Discuss types of training necessary for each classification of employees responding to mass casualty emergencies.

Develop a working Emergency Management Plan

Testing:

Students completing the course must take a proctored final exam. A score of 80% on the final exam is necessary to receive your professional credential. The student gets three (3) attempts to pass the course.
