Product	Timing	Rate	Value	Cost
	Preplant or Post-Harvest	32 oz/acre	EXCAVATOR® AMS is the industry's most aggressive residue management tool. Adding AMS and a non-ionic surfactant makes it the perfect partner for water-soluble burndown herbicides like glyphosate.	\$16.95 /acre
	NH3	6 oz/50 u N	MAINTAIN ELITE is an advanced nitrogen management system that increases nitrogen availability and uptake, in addition to reducing nitrogen loss due to leaching.	\$12.47 /acre
	28% or 32%	4 oz/50 u N	N-GEAR DUAL ACTION gives you flexibility of both above and below ground nitrogen protection. N-GEAR DUAL ACTION is specifically formulated for use in urea and UAN scenarios.	\$12.12 /acre
	Starter Fertilizer	2.5 lbs/acre	Upshift® C Plus powered by Ether™ Enzyme Technology proven to increase phosphate availability, increase nutrient and water availability and boost plant growth. Now with the inclusion of active, chelated Zinc to improve P:Zn ratio for better enzyme metabolic reaction in all crops. Also, the addition of phenolic acid compounds to assist with early season abiotic stresses for a revolution in all starter systems.	\$18.75 /acre
	Corn Planter Box	1 Pail / 125 acres	HOPPER THROTTLE MAXSTAX Corn is a revolutionary combination of 13 crop inputs, including multiple EPA-registered actives, delivered seamlessly through an advanced planter box seed fluency system.	\$37 /acre
	Soybean Planter Box	1 Pail / 40 acres	HOPPER THROTTLE™ MAXSTAX™ Soybean is a revolutionary combination of 16 crop inputs, including multiple EPA-registered actives, delivered seamlessly through an advanced planter box seed fluency system. Farmers can buy naked seed and use seed fluency through MaxStax and to replace liquid seed treatment.	\$37 /acre
	Post Herbicide	2 oz/acre	REVLIN EARLY-SEASON provides two essential growth-promoting plant hormones for optimal crop development and yield. These two EPA-registered plant growth regulators (PGRs) are found in nature and stimulate seeding and plant growth, improving root development.	\$3.29 /acre
	Post Herbicide	1 qt/acre	HARVESTSHIELD™ COMPLETE is a first-pass solution specifically formulated to protect and reduce yield loss of crops under abiotic stress conditions.	\$8.25 /acre
	Post Fungicide	12.8 oz/acre	REVLIN® LATE SEASON is a fortified cytokinin designed to increase pollination and support photosynthesis during fruit or grain fill. The unique combination produces more flowering / fruiting sites, and more importantly increases the plant's net capture of solar energy to help drive sugar production.	\$7.25 /acre
	Post Fungicide	1 qt/acre	HOMESTRETCH® is specifically formulated for foliar delivery of manganese, zinc and boron for all crops.	\$10.25 /acre
