P—Freedom Teams—Communications—Jitsi (3)
FreedomFocus.info © 2024

This option is free and doesn't have a time limit.
This option will work on phones or pads as well as computers.
It may automatically shut off cameras if needed for band-with.

Recipe for Jitsi:
1. In your computer browser, type in **meet.jit.si .**
2. Click Enter.
3. A screen will come up.
4. In the space to the left of "Start Meeting" type in, exactly, FreedomFindingFocus .
   a. Please note, this may not always be the meeting name.
   b. We are looking into creating a page with encrypted access to increase privacy and security for the name being used for each meeting.
5. Click on "Start Meeting."
6. If the option comes us for the app or the browser, it seems to work fine in the browser; no need to add the app.
7. A block may come up about installing Chrome; no need to do this, 'x' it.
8. A block will come up asking to allow use of your camera and microphone; you will need to allow this.
9. Add your name, first name and last initial is fine.
10. Click on "Join Meeting."
11. You will be joined into the meeting.
12. To see options at the bottom of the screen, place your cursor over the screen.
