Sketch of Buildings, Roads, Sewage System, Wells, Waterlines, Silt Fences, Etc

It is hereby understood that the applicant assumes full responsibility in obtaining the inspection and final approval of the Sunset Lake Association Sanitation Committee on all portions of this sewage disposal installation prior to covering any portion of the system. **It is also your responsibility to instigate an Erosion Control Plan which includes a type of silt fence or barrier which will stop any silt from eroding into the lake.** The approved plan must be in place during construction and held there until the effected area has reached a point of stabilization. If the plan is not followed through as the approved file plan indicates, a fine of \$20.00 per day will be assessed starting from the date of the infraction and continuing until infraction can be corrected. To request an inspection, call 627-3339 at least 24 hours before covering.

NOTE: The Sunset Lake Association Sanitation Committee does not guarantee trouble free operation of this sewage disposal system by the issuance of a sewage permit or final approval of the sewage installation. The property owner assumes full responsibility for its safe, healthful, nuisance free operation and maintenance.

I hereby certify that, to the best of my knowledge, the preceding information is correct. In addition, the sewage system will be installed strictly as outlined in this permit application, in conformance with the Sanitation Code of Sunset Lake and stipulations contained in this permit.
