# The London Look

We have unlocked the lightwell so that it can be used and enjoyed by all and due to our exceptional craftsmanship we can adapt the street level balustrade to form a compliant and very discrete gate which has been accepted and approved by all central London borough planning departments. To passing pedestrians the platform lift is virtually undetectable but at the push of a button it springs to life to provide easy access for disabled users.

## Contemporary Events Space

This large, contemporary events space has been created in Hammersmith. It includes a huge auditorium, meeting rooms, stage, restaurants and bars. Through our sales partners Lyfthaus designed and installed this stunning Mylyft Autograph platform lift with glass perimeter screening and balustrade with inset stone platform finish. The lift provides access from the entrance lobby to the raised ground floor level and the passenger lifts beyond and is relied upon as the only means of disabled access for the entire building. The Lyfthaus design complements the interior styling perfectly and ensures that the up-scale design language flows uninterrupted throughout the building's lobby space.

# 2018 WE HAVE LIFT OFF! A Year of Lyfthaus Innovation

2018 is set to be a very busy year. Along with the introduction of CPE, a 30% increase in our production capacity, improved processes and services as well as new QA procedures we will be launching a series of highly innovative products to meet our client's demands and that of the wider premium marketplace.

## We've listened!

We know what's important to our clients and always have the aim of providing products and services that meet the high demands of the prestige marketplace. Exceptional products, delivered on time that give long lasting reliability and we work hard to achieve these goals. We also pride ourselves on our architectural and styling knowledge, technical know-how and design awareness. The Mylyft Collection is highly stylised, exceptionally adaptable and out-performs all others in our sector and is supplied with a three years parts and labour warranty—the best in the business!

---

We never rest and this year Lyfthaus will be launching some extremely innovative and exciting new products. Mylyft SOLO is the much anticipated micro-lift. Designed to accommodate a single standing operator it's the low rise, compact solution that's ideal with home and work-place.

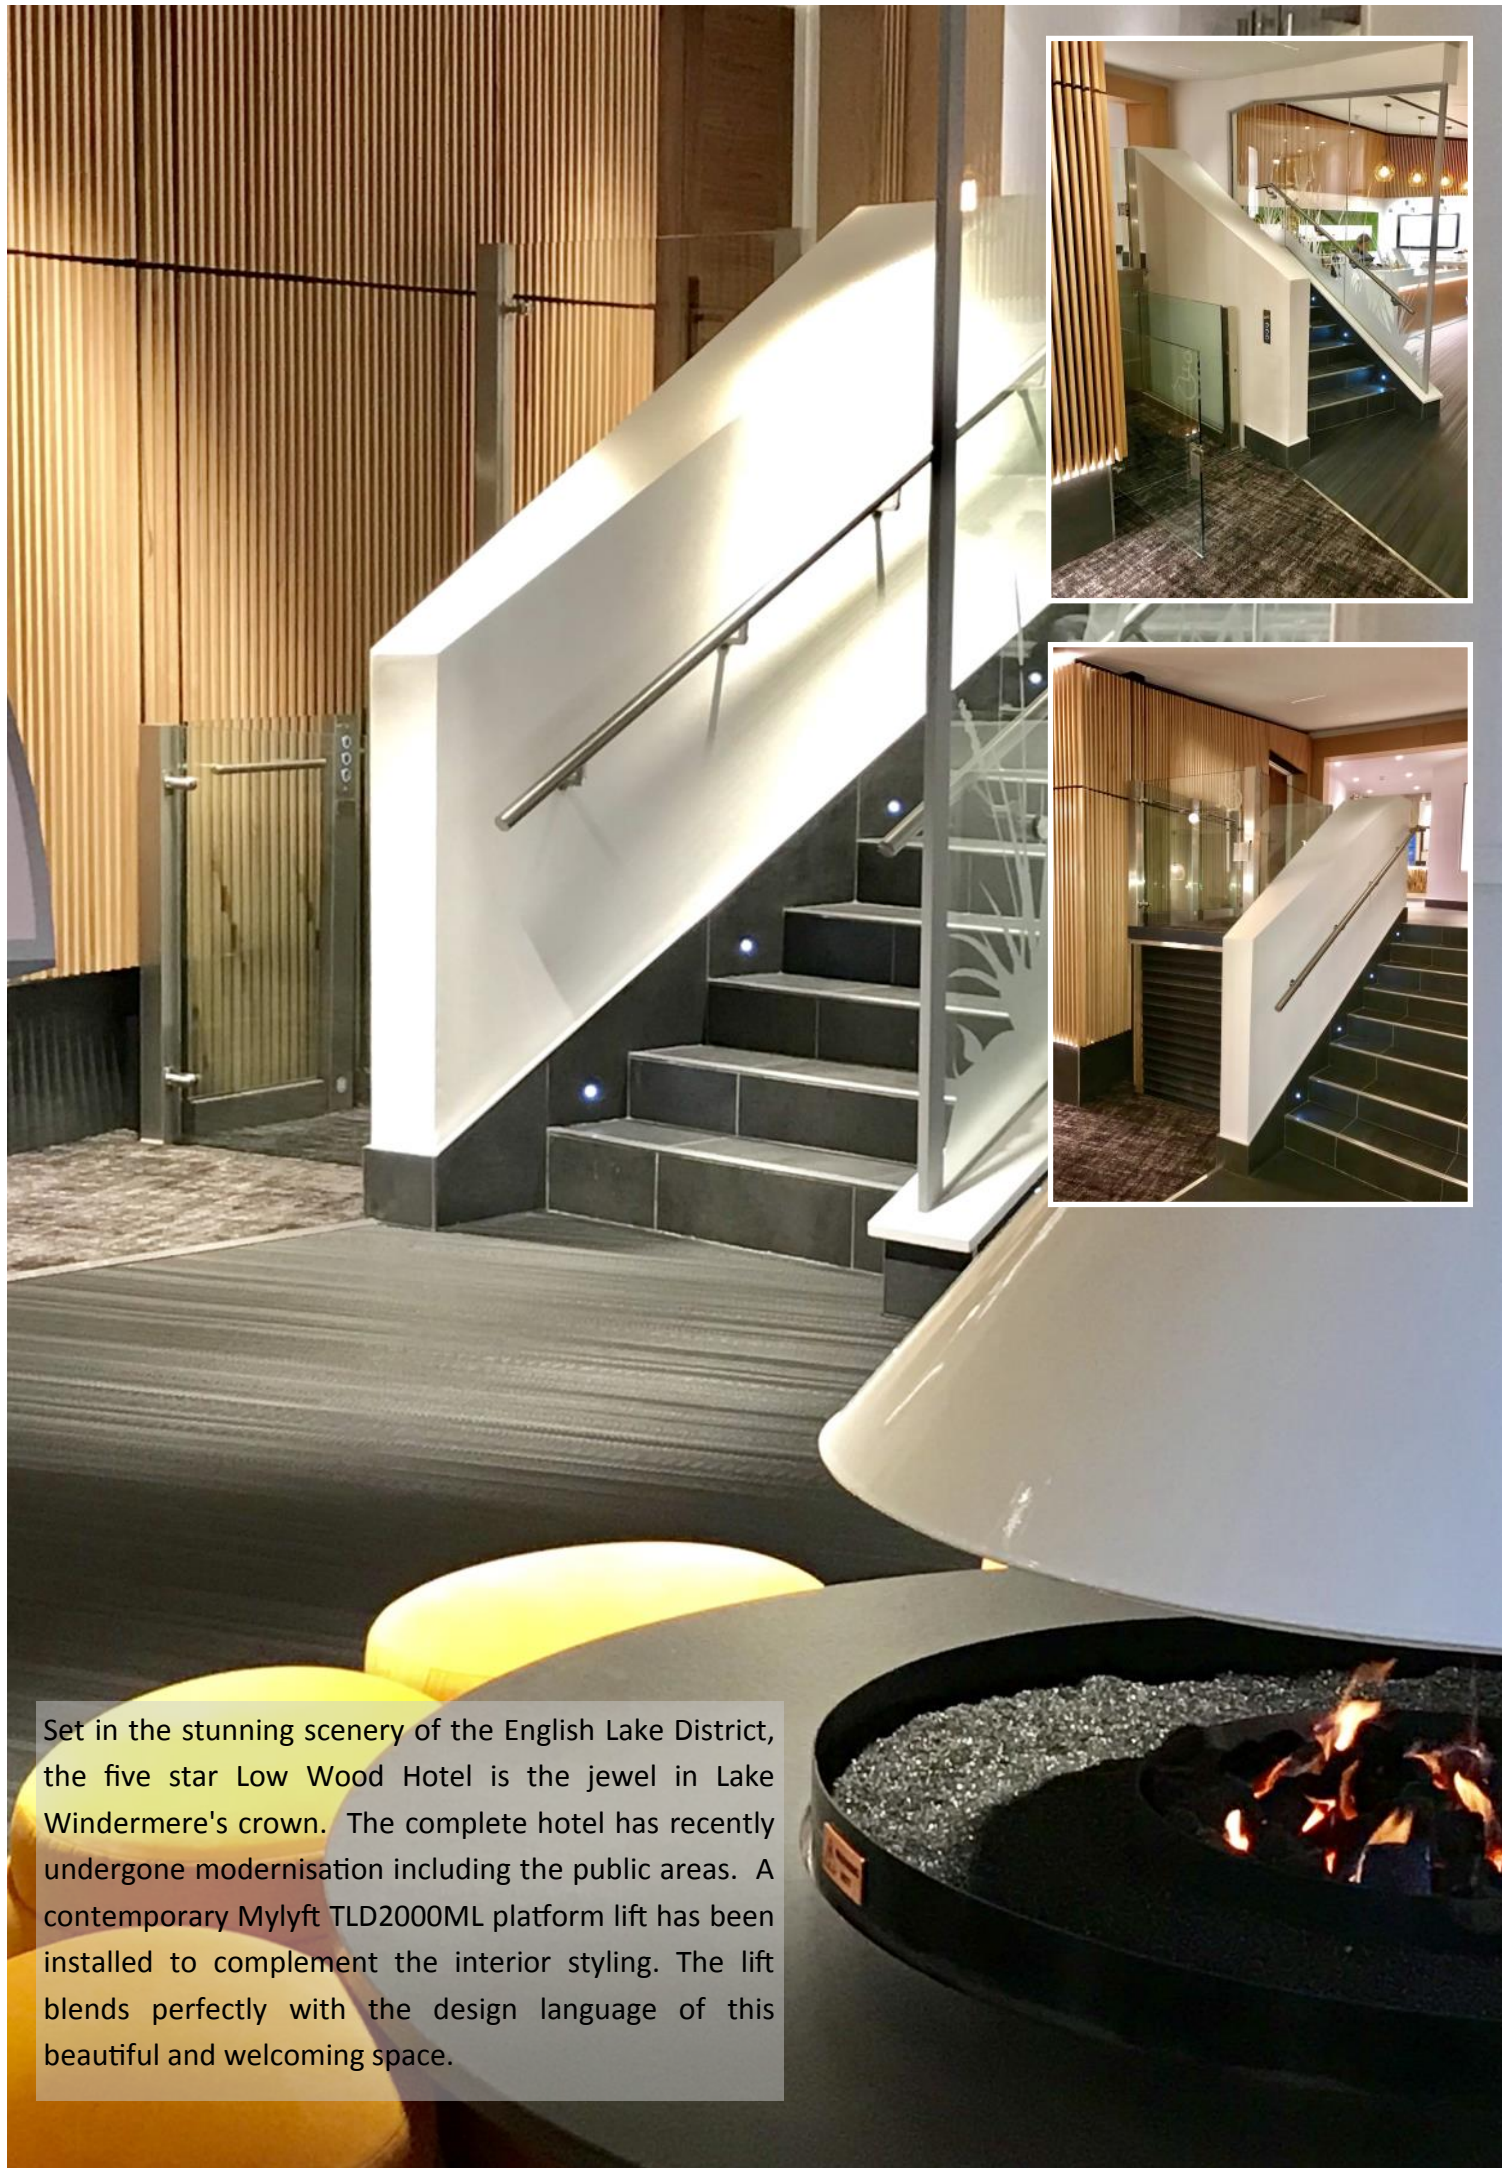

---

Mylyft TWIIN is another low rise, compact lift that's designed for a wheelchair user. It is our first lift to utilise a hydraulic lifting mast.

---

Finally we will introduce the second generation of Mylyft Signature. A full range of fixed specification premium platform lifts with interchangeable gates and barriers.

Set in the stunning scenery of the English Lake District, the five star Low Wood Hotel is the jewel in Lake Windermere's crown. The complete hotel has recently undergone modernisation including the public areas. A contemporary Mylyft TLD2000ML platform lift has been installed to complement the interior styling. The lift blends perfectly with the design language of this beautiful and welcoming space.

## Café Culture

Located in the new café extension of a grade one listed priory in Northamptonshire this Mylyft Autograph TBD2000ML double scissor mechanism platform lift features a powder coated plate aluminium side barrier to add an interesting design aspect and stone flooring set within the platform tray. This lift provides access between café level and the lower level ground floor disabled toilets and baby changing facilities. A 1850mm x 1100mm platform means the lift can also handle large electric disabled scooters in addition to prams and pushchairs.

# Studio One

Lyfthaus Technology Centre, Cambridge

Our newly remodelled Studio One is our dedicated final assemble and test suite for all Mylyft platform lifts. Each lift is fully wired and connected, soak tested and run prior to dispatch. All processes and tests are recorded as part of our pre-delivery inspection procedure. This includes working pressure, the control system and PLC, interlocks, splitter, hoses and links, power pack, cylinders, clapet and hose burst valves and all mechanical aspects. We are meticulous in every respect and take great pride in what we do.

Like all pioneers, the Lyfthaus founders' approach to platform lift design had to be unique. To be different. They wanted Lyfthaus to stand out by standing for something different and for many years the company has done just that. Year after year, new platform lifts and refreshed designs have been introduced, each as impressive as the last, keeping pace with continually evolving architectural trends. As time has progressed a company style has emerged and now the Mylyft Collection created by Lyfthaus of Cambridge is internationally recognised as the open aspect platform lift industry's leader in stylish contemporary design, technical innovation and bespoke adaptability. All proudly made near Cambridge, England.
