

QUEEN CITY FARMS

2023 PRODUCT CATALOG

WE ARE QUEEN CITY FARMS.

We started this journey three years ago because of our passion for farming. We didn't have huge financial backing or large plots of land passed down from previous generations, but what we did have was the will and desire to start somewhere, even if it was small.

We started in a small 400 ft² building on our residential property and have grown to a 6-acre plot with over 2000 ft² of indoor growing space. Our mission has always been to provide fresh produce and to make it affordable so that everyone can enjoy nutritional and local produce. We are here to create change in how local produce is sourced, and we believe that buying local, selling local, and supporting local is where it all begins.

Queen City Farms is changing how we supply fresh produce while being environmentally friendly! We know it's vital to not only provide the highest quality, but to do so by leaving a small carbon footprint. We recycle 90% of all water used on the farm and strictly use low-wattage LED lighting for vegetation growth. We never use harmful chemicals or pesticides and only source the highest quality seeds on the market. Our products are delivered within 24 hours of being harvested to ensure the longest shelf life for our consumers.

Queen City Farms is a fast-growing specialty produce grower located in Cincinnati, Ohio. Our farm is less than 500 miles from half of the U.S. population. We never let any produce go to waste; after every harvest, we donate nutritional mixes to local communities. We are excited to serve you and provide you with the best pricing and quality on the market.
