Automated Mail-In Ballot Verification Solution

What it is

- Physical processing of the incoming ballot envelope, which scans both sides of the ballot envelope, then **imprints a date and time stamp** with **batch number and sequence information**, then **automatically verifies the voter signature** via the bar code containing the voter ID.

What it isn't

- It is **not a solution for recording an actual voting record** into the voter registration system; that requires other software for voting record scanning.
