DUAL-BACKHAUL KIT

COMET INDIGICASE

SATELLITE OR CARRIER CONNECTIVITY IN A RAPID-DEPLOY CASE

Stay connected when networks aren't.

Satellite or carrier-connected communications—instantly.

COMET's IndigiCase Dual Backhaul Kit delivers secure, high-performance connectivity in a compact rugged case. Teams can establish reliable Wi-Fi through Starlink satellite service or available 4G/5G carrier service—ideal for remote, degraded or rapidly changing environments.

KEY CAPABILITIES

- Dual backhaul flexibility — Starlink satellite or 4G/5G carrier connectivity.
- Rapid deployment — a fully integrated system that activates in minutes.
- Semtech AirLink XR60 — industrial-grade routing for harsh environments.
- Ruggedized hand-carry case — compact and weather resistant.
- Wi-Fi 6 — secure wireless communications for up to 32 concurrent users.
- Remote-ready design — built for infrastructure-limited operations.

When networks fail, the mission can't wait

Disasters, remote terrain, and surging demand routinely outpace fixed networks. A traditional Cell-on-Wheels can take weeks to months to arrive. Teams need coverage that deploys in minutes — and works when everything else fails.

Infrastructure fails

Storms, wildfires, and outages knock out cellular exactly when it's needed most.

Coverage gaps

Rural, tribal, and remote areas are routinely beyond reliable carrier reach.

Too slow to deploy

Permanent builds and carrier COWs take weeks — response can't wait.

Missions move

Events, worksites, and operations shift location and demand constantly.

BUILT FOR

Disaster response • Remote worksites • Utility restoration • Field offices • Tribal communities

RAPID DEPLOYABLE CONNECTIVITY

COMET INDIGICASE

Stay connected when networks aren't.

WHAT'S INCLUDED

- Semtech AirLink XR60 router
- Integrated Wi-Fi 6 capability
- Starlink compatibility
- 4G/5G carrier connectivity support
- Ruggedized deployable enclosure
- AC/DC power input system

OPTIONAL ADD-ONS

- Extended battery solution
- Solar charging options
- Vehicle mounting kit
- Managed NOC services
- External antenna options

TARGET INDUSTRIES

- Emergency management
- Utilities and energy
- Public safety
- Defense and homeland security
- Tribal governments
- Construction and infrastructure
- Remote healthcare

OPERATIONAL BENEFITS

- Deploys in minutes
- Flexible satellite or carrier backhaul
- Ruggedized for field operations
- Compact hand-carry portability
- Reliable connectivity in remote areas

WHY COMET DUAL BACKHAUL KIT

Operations do not stop at the edge of traditional infrastructure. COMET's IndigiCase Dual Backhaul Kit gives teams the flexibility to use satellite when terrestrial networks are unavailable or carrier service when it is present—delivering dependable communications wherever the mission moves.

INDIGITECH
A Division of Teltech

MISSION READY

One rugged case. Two backhaul paths. Communications where the work is.
