

# Spectrum Risk Assessment

Interactive PDF for Tribal 2.5 GHz readiness

Evaluate current deployment risk, surface planning gaps, and generate a leadership-ready summary for strategic discussion. This assessment is designed for Tribal decision makers, grant support conversations, and internal planning sessions.

## What this assessment delivers

- A weighted risk score based on deployment, funding, engineering, and timeline readiness
- An automatically assigned risk tier: Low, Moderate, High, or Critical
- Recommended next steps tailored to current readiness
- A polished summary page ready to save, print, or attach to planning discussions

## How to use this PDF

- Complete the assessment questions on the next two pages.
- Open in Adobe Acrobat or Adobe Reader for the best automatic scoring experience.
- The Results page updates score, risk tier, and guidance based on your selections.
- Save the completed PDF for leadership review or send it to IndigiTech for follow-up.

# Assessment - Part 1 of 2

Select one response for each question. Higher-risk answers carry more points.

## 1. Does your Tribe currently hold a 2.5 GHz spectrum license?

- Yes
- Not sure
- No

*If No is selected, your score will reflect absence of a Tribal 2.5 GHz license for this assessment.*

## 2. Has your Tribe deployed any infrastructure using this spectrum?

- Yes - active network is operating
- Yes - limited infrastructure has been deployed
- Planning is underway, but nothing is installed yet
- No deployment has begun

## 3. What best describes your current deployment stage?

- Operational service to homes, facilities, or community sites
- Engineering / design complete
- Feasibility study complete
- Early discussions only
- No formal planning

## 4. Does your Tribe have a documented plan to meet the 2026 deployment deadline?

- Yes - with timeline and implementation team
- Yes - but plan is still being refined
- A plan is being discussed
- No formal plan exists

## 5. When do you expect deployment to begin?

- Already underway
- Within 3 months
- Within 6 months
- More than 6 months away
- Unknown

## Why these questions matter

Deployment risk is driven less by intent and more by readiness. The heaviest-weight variables are whether work has begun, whether there is a formal plan, whether funding is secured, and how quickly deployment can start. This structure mirrors the planning priorities outlined in IndigiTech launch messaging and Tribal spectrum readiness content.

# Assessment - Part 2 of 2

Complete the remaining questions. Results update automatically on the next page.

## 6. Has your Tribe secured funding for deployment?

- Yes - funding is secured
- Partially secured
- Applications submitted
- Funding sources identified but not pursued
- No funding strategy yet

## 8. Does your Tribe have a deployment or engineering partner in place?

- Yes
- Discussions underway
- No
- Not sure what is needed

## 10. What is your Tribe's primary broadband objective right now?

- Protect existing 2.5 GHz spectrum
- Build community broadband service
- Support healthcare, education, and public safety
- Explore options and learn what is possible

## 7. Has your Tribe completed a broadband feasibility study or engineering assessment?

- Yes
- In progress
- Not yet
- Not sure

## 9. Does your Tribe have access to sites, towers, rooftops, or other infrastructure that could support a network?

- Yes - infrastructure is available
- Some infrastructure is available
- We may need new infrastructure
- Unknown

## Optional follow-up preferences

- Request a strategy session
- Need urgent spectrum protection help
- Interested in funding guidance
- Interested in engineering / deployment support

Selections here are preserved when the PDF is saved, making this file easy to circulate internally or send to IndigiTech as a completed assessment.
