

Teltech Launches IndigiTech: Connectivity Rooted in Sovereignty

Flower Mound, TX (September 18, 2025) — Teltech Communications, LLC proudly announces the launch of its new subsidiary, IndigiTech, an indigenous-led and sovereignty-centered company dedicated to empowering Tribal Nations through connectivity.

Guided by Native leadership and designed in partnership with Tribal communities, IndigiTech is more than a technology provider — it is a trusted ally committed to bridging the digital divide in Indian Country. Backed by Teltech’s 25 years of telecommunications experience, IndigiTech offers customized digital infrastructure solutions that honor culture, sovereignty, and community needs.

“IndigiTech was founded on the belief that connectivity is not just about technology — it’s about sovereignty, health, education, culture, and opportunity, said LaRay Guerrero, Haliwa-Saponi Citizen, CEO at IndigiTech. “By placing tribes at the center of every solution, IndigiTech delivers tailored strategies and connectivity that enable long-term self-determination and digital independence.”

IndigiTech offers:

- Custom connectivity solutions tailored to each tribe’s priorities
- Potential profit-sharing and revenue-generating partnership models
- Feasibility and grant assistance for spectrum and funding opportunities
- Engineering, deployment, training, and education services
- Fixed wireless and private network solutions designed for tribal lands

“Many Tribal Nations hold access to the historic 2.5 GHz spectrum, a once-in-a-generation opportunity to build sovereign broadband networks. However, without swift action, this resource could be lost,” said Lisa Hanlon, Cherokee Nation Citizen, Co-Founder & CEO of Teltech. “IndigiTech is committed to helping tribes take advantage of this critical moment with affordable equipment, discounted pricing, and hands-on support to turn spectrum access into tribally controlled networks.”

“IndigiTech was born out of a belief that tribes deserve more than connectivity — they deserve sovereignty over their digital future,” Hanlon added. “We are honored to invest in work alongside Native leaders who are shaping the future of Tribal Lands.”

Rachel Salinas, Lipan Apache Tribe of Texas Citizen, Chief Marketing Officer at IndigiTech said “IndigiTech is built by Native voices for Native Nations. We are community-focused and future-ready.”

IndigiTech is launching its “Tribal Connectivity Tours,” working directly with Tribal Nations to design networks that strengthen sovereignty, preserve culture, and create lasting opportunity.

Delvin Johnson, Alabama-Coushatta Tribe of Texas Citizen, Chief Cultural Officer at IndigiTech said, “IndigiTech honors the legacy of the first communicators of this land by equipping Native Nations with the tools to thrive in a connected world.”
