

Job Title: Senior Mechanical Services Engineer

Location: Birmingham, with client site visits across the region

£45,000pa - £55,000pa

Permanent, Full Time

About the Role:

My client is seeking a Senior Mechanical Services Engineer to join their dynamic team. In this role, you will play a pivotal role in project delivery, showcasing your technical expertise, leadership capabilities, and problem-solving skills. You will be a key decision-maker, overseeing multiple projects and managing junior team members. Your ability to foster strong client relationships and deliver high-quality, timely work will be essential for continued success and repeat business. You should possess a solid track record working across a variety of sectors and demonstrate proficiency in managing projects from inception to completion.

The ideal candidate will be a Chartered Engineer, holding a relevant degree, with experience in leading teams and delivering engineering solutions to high standards.

Key Responsibilities:

- Lead selected projects as the Project Leader.
- Foster a culture of technical excellence within the team.
- Deliver client presentations and represent the company in meetings.
- Build and maintain strong client relationships to generate repeat business.
- Oversee projects from start to finish, ensuring all deliverables meet client specifications.
- Manage Engineers and Technicians in tasks such as calculations, design work (drawings, specifications, and reports), site surveys, and construction duties.
- Liaise with clients and members of the design and construction teams to ensure smooth project execution.
- Contribute to project costing, management, and scheduling.

Skills, Experience & Qualifications:

- A degree in Building Services Engineering (Chartered or working towards) or equivalent; candidates with HNC/HND and relevant design experience are also encouraged to apply.
- At least 3-4 years of experience in building services design, with a proven ability to manage and deliver projects across a range of sectors.
- Proficient in design software such as Microsoft Office, IES, and Revit.
- In-depth knowledge of British Standards, Building Regulations, HTM's, and relevant industry codes.
- Understanding of integrating renewable technologies in designs.
- Experience in managing Junior Engineers, Apprentices, and Graduates.
- Strong communication and project management skills.
- Solid understanding of the commercial aspects of projects.
- Confident in presenting technical concepts and simplifying complex information for clients.
- Experience in writing bids, proposals, and tender specifications.
- Essential technical experience: Mechanical Building Services Design.
- Willingness to travel to client sites across the region and to the office in Birmingham.
