

5.11 Emergency Airway Management—TYPE I

Applicable Levels

LI, LII, LIII, PTCI, PTCII

Definition and Requirements

All trauma centers must have a provider and equipment immediately available to establish an emergency airway.

Additional Information

The emergency airway provider must be capable of advanced airway techniques, including surgical airway.

Measures of Compliance

- Plan for emergency airway management that specifies provider and means of escalation
- Equipment evaluated during the site visit process
