**CABINET
ARMOR**®

The most simple and cost effective way
to protect cabinetry & countertops during
construction or remodeling projects

Disclaimer

As with any adhesive product, be sure to test on your cabinet finishes prior to complete application. This product is NOT to be used on uncured finishes or on cabinets that have been cleaned with chemical cleaners, as the adhesive may react to the paint or cleaning chemical residue. Wipe off dust/dirt from cabinets prior to applying Cabinet Armor. Tape is pressure sensitive; you will need to apply some pressure to the taped area to achieve maximum adherence. Not recommended on any product overlayed with a paper finish. Not recommended for more than 30 days usage.

Advantages

Cost Effective

Easy One-Person
Installation

Perforated
(no cutting required)

Made in the U.S.A.

100% Recyclable

No Tools Necessary!

Cabinet Armor

Diameter: 4.5"

Weight: 4 lb.

Thickness: 22 mm

Perforation: . . . every 15" +/-

Adhesive Tape: top 1.5"

Recommended Usage: 30 days

Installation step by step

**** IMPORTANT ****

- 1 Wipe dust from cabinetry using included towlette or a soft, clean, and damp cloth
- 2 Peel tape-backing from the adhesive strip
- 3 Apply adhesive strip to the top of your cabinet face firmly, to ensure good contact
- 4 Tear at perforation to desired length

***** For best results, it is essential that your intended surface is DUST FREE, and NO CHEMICAL CLEANERS OR RESIDUE are present prior to adhering Cabinet Armor. *****
