## World Water Crisis:

1.1 billion people lack access to clean drinking water!!!

Women spend 200 million hours a day collecting water!!!

Every 21 seconds a child dies from a water-related illness!!!

The Earth has been polluted beyond our ability to cleanse it!!!

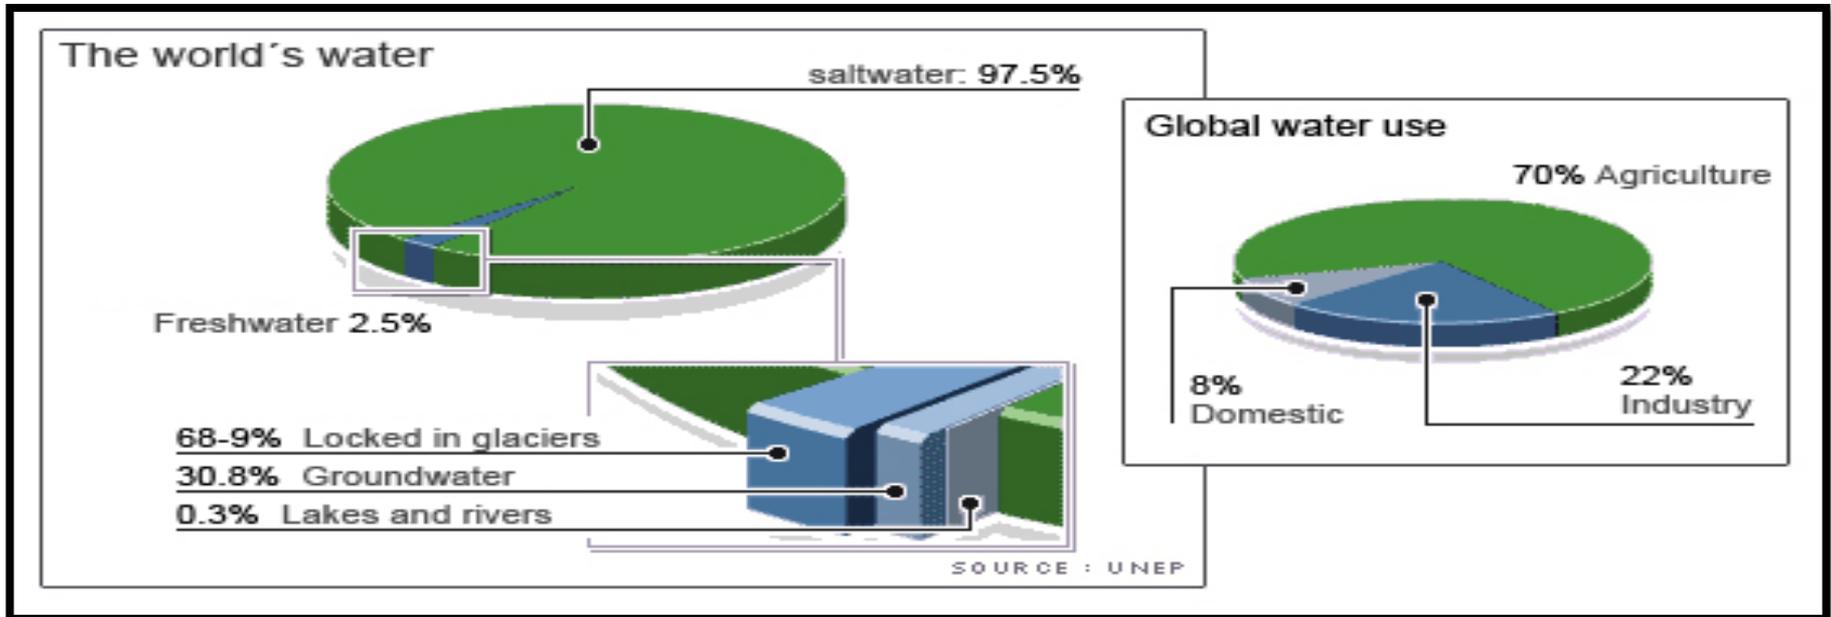

Pollution Continues to contaminate the earth at an alarming rate!!!

## Where is the Worlds Water?

97.5% of the water is undrinkable saltwater, which leaves 2.5% fresh water. 70% of the fresh water is locked in Polar Ice Caps, leaving the World with just 30% of 2.5%, less than 1% of the Worlds water is fresh.

Untouched Fresh Water sources can be found everywhere in the World. The Humidity in the air is the largest untapped fresh water resource!!!

## Citi: The Biggest Opportunities In Water Investing

Jul. 14, 2012, 4:07 PM [Matthew Boesler](#)

The discussion surrounding water investing is growing as the global population swells and water becomes an increasingly scarcer commodity.

Citi recently held a Water Investment Conference with several panel discussions featuring industry executives and portfolio managers investing in the water space. They released a report with the key takeaways from the panels.

The panelists identified key areas within the water equipment industry that look poised to benefit most from global water trends. ♦

## Fresh Water “New Gold”; Future Wars Over Water:

“Is water the gold of the 21st century?” asks Fortune.

Answer: Yes, water is the New Gold for investors this century.

In 2010 global water generated over a half trillion dollars of revenue. Global world population will explode from 7 billion today to 10 billion by 2050, predicts the United Nations and over one billion “lack access to clean drinking water.”

## Invest Like a Billionaire: Water Is The New Gold

Last year, legendary investor Warren Buffet bought a water treatment provider, Nalco Holding Company, adding to other water-related investments in his wildly successful portfolio.

Fresh Water “New Gold”; Future Wars Over Water:

The **World Bank** estimates water availability will change dramatically by the middle of this century, leading to what some have called “WATER WARS.”

### Will water supplies provoke World War III?

Extreme climate change and a global scarcity of vital resources could prove to be an explosive combination. Start with one simple given: the prospect of future scarcities of vital natural resources, including energy, water, land, food, and critical minerals. This in itself would guarantee social unrest, geopolitical friction, and war!!!

Solution to this crisis is H2OLiquidAir!!!

H2OLiquidAir is Solving the Worlds Water Crisis One Drop at a Time!!!

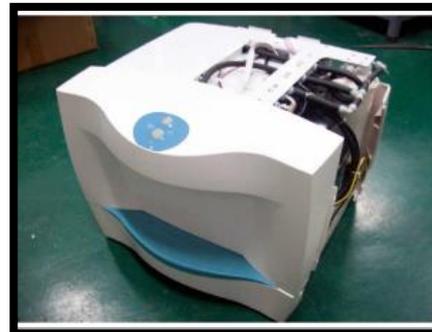

# H2LIQUIDAIR<sup>INC.</sup>

PURE DRINKING WATER OUT OF THIN AIR

We have developed new product proto-type ideas to re-enter the market globally as well as in the USA.

These products will be developed under joint venture partnerships established by H2OLiquidAir International. These joint venture partners will be in different regions of the World for global expansion.

The newly developed products will be designed with different features to penetrate different markets and pricing points suited for each new market will be established.
