RICE GERM POLYAMINES

www.nutralandusa.com

POLYAMINES & SPERMIDINE

Polyamines (PAs) are organic compound having two or more amino groups.

Spermidine (SPD), along with **Putrescine** (PUT) & **Spermine** (SPM), are the main Polyamines in mammalian cells and plants and play an important role in cell growth/health.

Though it was originally isolated from semen, Spermidine is the main Polyamine found in plants.

THE STORY

POLYAMINES & LONGEVITY

A study published in 2012

Revealed an interesting finding:

Spermine & Spermidine concentration in the age group of 90–106 years-old are found at the same level of those in their 30's.

This may indicate an important correlation between Polyamines levels and longevity.

THE STORY

POLYAMINES & SPERMIDINE IN FOOD

Fruits & Vegetables

Apple, Avocado, Banana, Broccoli, Cauliflower, Orange

Meat

Beef, Chicken

Legumes & Soybean products

Chickpea, Lentil, Soybean, Tofu

Fish & Seafood

Cod, Salmon, Shrimp

Nuts

Almonds, Chestnuts, Pistachios

Dairy products

Milk, Yogurt

Cereals & Mushrooms

Rice, Wheat, Shitake

Aged Cheese

Cheddar, Brie

THE STORY

HEALTH BENEFITS

Polyamines (PAs) play multiple roles in cell growth, survival and proliferation. Changes in polyamine levels have been associated with aging.

There are extensive studies on the physiological functions of polyamines (Spermidine, Putrescine & Spermine) and their importance for cellular health.

"Dietary supplementation of spermidine prolongs life span and health span by protecting from a range of age-associated pathologies in several animal models."

HEALTH BENEFITS

THE SCIENCE

POLYAMINES & SPERMIDINE IN SUPPLEMENTS COME FROM **3 SOURCES**

SUPPLEMENT OPTIONS

...AND THEY ARE NOT CREATED EQUAL

Unnatural trihydrochloride
Made with harsh chemicals
Impurities/Safety unknown

Natural & Hypoallergenic
Non-GMO & Gluten Free
Rich in other natural Polyamines

1 of the 9 Major Allergens
May cause Wheat allergy
May contain Gluten

SUPPLEMENT OPITONS

Why not "pure" Spermidine?

1

So-called "Pure" Spermidine is commercially available in the unnatural **Trihydrochloride** form, with impurities and safety unknown.

2

There is no sufficient safety studies and health benefits studies done with "pure" Spermidine.

3

Polyamines (Putrescine, Spermidine & Spermine), not just Spermidine, are consumed in food and have shown health benefits in numerous studies.

miricell™

WHY & HOW
WE CREATE IT
FROM RICE

mi

(Chinese character for **rice**)

THE CREATION

miricellTM

WHAT IS IT

**Natural Polyamines from Rice.
Standardized to 1% & 2%
Spermidine.
Rich in other PAs and nutrients.**

THE CREATION

Natural

Naturally and gently extracted from Rice

Non-GMO

Made with Non-GMO Rice Germs only

Allergen-Free

Allergen-Free & Gluten-Free

Vegan-Friendly

Vegan & Vegetarian

Sustainable

Eco-friendly & sustainably made

Complete

Rich in Spermidine & Polyamines

miricell™

Rice Embryo (Rice Germ), which is full of nutrients (and rich in Polyamines), is one of the "modern" Rice Milling byproducts when Brown Rice is processed into White Rice. Such byproducts are usually disposed as waste or used for feed purpose.

UPCYCLING

Miricell™ is made from the usually wasted Rice Germ in rice milling, to not only transform it into a nutraceutical ingredient with great health benefits, but also respect and fully use the resources gifted by nature for a sustainable future.

THE CREATION
