

VISION

VISION Digital Parking System

VISION is a customer service 1st enforcement and payment system for the non-gated parking industry. VISION provides 24/7 enforcement and payment services to maximize revenue generation for our partners and asset owners.

VISION

VISION by CLANCY is the original automated enforcement system allowing for 24/7 enforcement in North America. Leveraging decades of experience paired with the latest in .AI software recognition development has allowed VISION to become the premier turnkey solutions provider it is today.

Digital automation of the parking process begins when VISION captures the parking vehicles Vehicle DNA as the parker enters your lot. This parker may pay for parking at a payment station, via a 3rd party payment application, validation or even thru a QR weblink posted on your lot.

This parker can pay upon *arrival, departure or even after returning home*. The VISION system will calculate the time stayed and analyze the parking payment to your rate structure.

Providing turnkey CUSTOMER 1st solutions is where the VISION digital platform stands out. Any parker that does not pay for parking is put into the citation protocol and automatically issue a citation at the close of business day based on the registered owner of the vehicle (*no personal information gathered*). Once the invoice (or notice) is created, our team of professionals will verify the data, distribute the citation and collect the payment; all on your behalf.

With customer service in mind, our agents keep your Clients parkers happy; even in the case of a violation challenge.

FRICTIONLESS PARKING.

Entry & Exit to your parking lot is a free flowing experience (no ques), this parking experience is unmatched in parking.

24/7 OPERATION.

Solve the enforcement puzzle of collections vs. cost with VISION. Automated enforcement allows your lot to stay open for revenue generation 24/7 w/o the labor to enforce on your own!!

SUPPORT

VISION SUPPORT SERVICES

Aside from the obvious system features that stand VISION above any other gateless system in the industry is a customer service oriented platform for citations and collections. We do not 'share' or 'scalp' your revenues, they are yours.

Our Agents MANUALLY check every violation on your lot the next business day and generate then distribute the citations. NO invalid plate entry, NO bully collection services just a customer 1st attitude to keep your parkers (and ratings) positive.

Our reputation and history speaks for itself. Please check our BBB ratings against other providers in the industry. You will find our ratings to be A+ across the board, which is what operating with customer service on your behalf will earn for all involved. Don't fall for hefty revenue shares with poor customer service, invest in the original, invest in your VISION!

VISION SERVICES

- Citation Issuing Services
- Citation Collection Services
- Citation Payment Portal
- Registered Owner LookUp
- Call Center Services
- 3rd Party Integrations

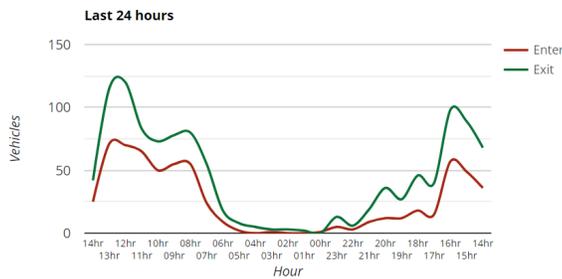

VISION.FEATURES

A robust system dashboard allows for a deep dive into vehicle captures, occupancy distribution, violations, citation generation, reporting and members. Advanced AI development processes allow our imagers to identify and log the Vehicle DNA of every vehicle that enters your parking asset.

A check of any 3rd party KIOSK or payment application is instantly identified in the dashboard as paid. When the parker chooses not to pay for time parked our system automatically checks the registered owner and places the vehicle into the citation protocol.

Clancy Vision Vehicle DNA Dashboard

Counts

Last Captures

Plate	State	direction	Time	Image	
BCIF27 (88.800%)	us-co	225° Entrance Left	1/18/2022 2:29:30 PM		WELTON
ALEH89 (90.000%)	us-co	60° Exit Left	1/18/2022 2:28:55 PM		CHEROKEE
ALEH89 (89.300%)	us-co	90° Exit Right	1/18/2022 2:28:52 PM		CHEROKEE

VISION is a revolutionary gateless digital parking system and so much more! Boasting features commonly found in a traditional PARCS gated system brings VISION head and shoulders above any competitors.

VISION is the ONLY CUSTOMER 1st enforcement system in today's market. Our agents physically review each and every violation generated by the system for non-payment to insure the violation is valid and enforceable. Our agents handle the entire process on your behalf, issue/deliver citations, collections and remediation.

By querying your on-site kiosks, 3rd party payment applications, validations, hotel guest usages as well as embedded payment systems and monthly parkers your system now works for you; 24/7. VISION puts your gateless parking facility to work

VALIDATION MODULE.

A historical impossibility in surface lot gateless operations is offering merchant validations. VISION is your solution.

HOTEL MODULE.

Hotel guests and visitors can be managed all through the hotel PMS. Use our simple interface to register guests/rooms for the length of stay.

EVENT PARKING MODULE.

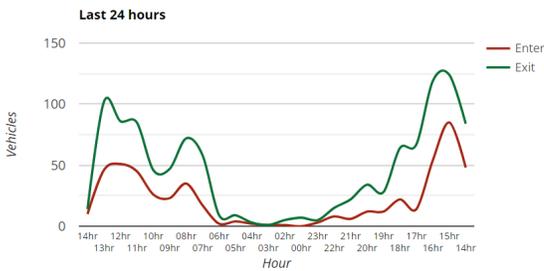

Incorporate validations into your surface lots, provide VIP parkers with a link to register a vehicle for an event (or season). All with no APP to download or open.

VISION.MODULES

Reporting system

VISION reporting shows your validated parkers, hotel parkers, violators, etc... Keeping your parking operation in the know 24/7

Counts

Hotel system

VISION.HOTEL keeps your hotel operation in the black and secure. Track and collect all payments thru the PMS system, even for park&ride customers.

Event System

VISION.EVENT is a frictionless and labor(less) way to run high-volume event parking. Eliminate dangerous cash handling and in-traffic attendants. Simply place a payment link for your event and let your parkers pay anytime before or after the event.

Citation System

While VISION process surface parking violations with an automated process there are situations that require manual citation/enforcement. VISION has both Mobile LPR and Handheld Citation solutions available.

VISION.ENFORCE

Clancy Systems, Inc. is a longtime industry powerhouse. The VISION.ENFORCE solution offers unique features to the parking enforcement agency that other providers simply cannot come close to matching. Clancy Systems, Inc. has been providing parking enforcement solutions since 1986 and has evolved over time with technology advances. The current on-street solution utilizes mobile LPR and/or a cell phone app with a proprietary citations printer. As the parking enforcement officer uses the app to write and print the ticket it is saved on our server for follow-up and collections. To date, our system has issued millions of citations across the United States.

Standard System Services

- Ticket issuance field units (mobile device with Bluetooth printers)
- All charging equipment
- System software - Stratus software version - cloud environment
- Continuous System support
- Hardware maintenance (repair and replacement of malfunctioning equipment)
- Procurement of supplies (ticket stock and envelopes)
- Server hosting

Our citation solution is robust and widely accepted. A powerful tool for all types of enforcement.
