! NEVER INSTALL THE POSTS IN HIGH WINDS. ENSURE NO CHILDREN ARE PRESENT WHEN INSTALLING POSTS AT ANY TIME.

ALWAYS USE A PROTECTIVE PIECE OF WOOD (NOT INCLUDED) BEFORE HAMMERING THE TOP OF THE METAL SPIKE.

This will protect the metal anchor spike and prevent the top becoming misshapen. If the metal spike becomes misshapen and is not covered under the guarantee. If the ground is hard, water the ground to soften and use a starter metal pole not included.

! **IMPORTANT**

When installing your portable rugby posts always be aware of safety. See overleaf for details on recommended installation. **Remember** always insert the ground anchors the correct distance apart - lay the crossbar on the ground to mark the space apart. **Always** insert the ground anchors perpendicular - use a spirit level. If the ground is very hard water the ground to soften before hammering the anchors in. Once the posts are assembled you must risk assess the stability of the posts. If you find the posts are unstable ie because your ground is loose sandy soil we recommend purchasing the optional ground sockets that can be concreted in position. **NEVER INSTALL POSTS IF YOU DO NOT HAVE SUFFICIENT PEOPLE TO DO SO SAFELY; WE OFFER AN INSTALLATION SERVICE AT ADDITIONAL COSTS IF REQUIRED.**

The portable spiked rugby post is designed to be used in different locations. Ideal for tournaments and when posts are dismantled and stored or used in multiple locations. If you find you would like to have the posts permanently in position on one position it is advisable to concrete in optional extra ground sockets. Separate instructions can be supplied with details about installing concrete sockets.

OPTIONAL EXTRA - TRAINING AID RUGBY POST CONVERSION TRAINING NET

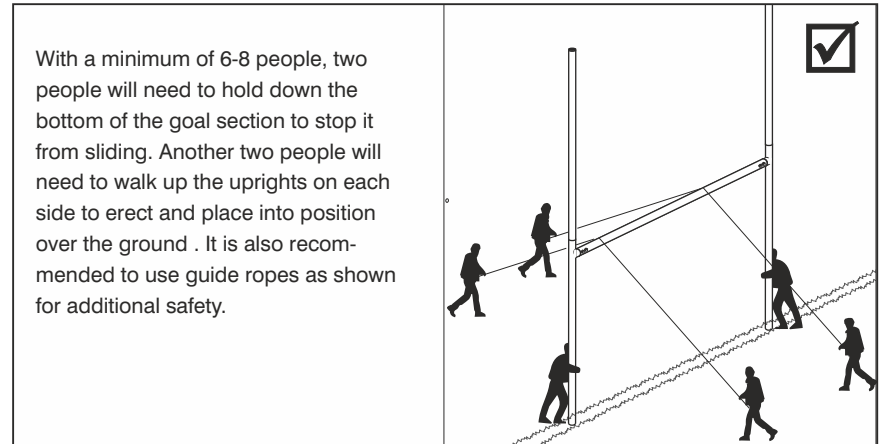

The quick fitting removable net will give you more time practicing Rugby conversions

DAMAGED COMPONENTS requested under guarantee must be returned for inspection. Failure to follow the warnings, assembly and fitting instructions contained in this document, may invalidate your guarantee.

Make sure no children are present before you install the goal, and mark out a child free safety area which is **28 ft** long and **18ft** wide in front and behind the goal in case it topples during installation

With a minimum of 6-8 people, two people will need to hold down the bottom of the goal section to stop it from sliding. Another two people will need to walk up the uprights on each side to erect and place into position over the ground. It is also recommended to use guide ropes as shown for additional safety.
