

## Oxygen

Lyrics by Denny Anthony

Imagination dulled by what we see  
Call it a plan that supercedes  
    But we know  
    All that is lost is never truly lost  
    Not anymore  
    And we know  
    There's nothing we can't do  
    Not anymore  
        Because we are never without Love

Conjur conscede by all that stands in waste  
Some call is Love in action without haste  
    And we know  
    All inside us leads the way  
    Forevermore  
    And we know  
    There's always Love's demand  
    Forevermore  
        Because Love is what we need... to breathe

Love is our Oxygen  
Everything we need to breathe  
Love is our Blood  
Everything we need to feel  
Love is our Water  
Everything we need to know  
Love is our Oil  
Everything we need to grow
