## KAYO KOI

by Kayo Shibue

Growing up in Japan, Kayo Shibue was exposed to traditional Japanese artwork, architecture, ceramic, and printmaking techniques from a young age. She went on to hold various professions including athlete and editorial photographer before becoming an artist—and Tommy Bahama's Senior Textile Designer. Kayo's love of nature—lush plants, scenic views, and their unique movements—is ever-present in her vibrant and elegant work. In this print, she celebrates her Japanese heritage with canvas and pigments sent from Japan and, like many Japanese paintings commonly feature, an original artist signage stamp unique to her and her work.

## NOVA WAVE ALOHA TROPICS

by Jana Lam

Born and raised in Hawaii, Jana Lam is an artist, designer, and business owner. Beginning with a screen-printing workshop in her parents' garage, she now has her own workspace and retail shop in the up-and-coming artsy neighborhood of Kaka'ako in Honolulu, where she creates hand-drawn, screen-printed textiles. Jana's mission is to spread her love of color and design through her work. Continuing her signature process of paying special attention to color and movement, she selected the particular color standards for this print, creating a vibrant, energetic pattern that truly comes to life.

## CYBER BLOSSOM

by Jordan Bigelow

For Pittsburgh-based Jordan Bigelow, this is just the beginning of her fashion career. As a graduate of Kent State University, Jordan received a Bachelor of Science degree in Fashion Apparel Design and Fashion Merchandising. She has held multiple internships focused on trend forecasting, design, and fashion studies abroad. In 2022, Jordan was one of three winners in the Eric Emanuel x Fashion Scholarship Fund Design Challenge. She developed a graphic design that was featured on a limited-edition run of Eric Emanuel's signature 'EE' mesh shorts. Jordan often draws inspiration from African wax print fabrics and '70s design aesthetics. For this print, she used pencil sketches and then a graphic design program to color and scale it, creating a bold eye-catching print that's truly, uniquely, one-of-a-kind.

## OCEAN LIFE

by Crystal Worl

Crystal Worl is a talented multidisciplinary artist based in Juneau, Alaska. She is also a co-owner and designer of Trickster Company, an online gift shop focused on Indigenous art. Crystal is Tlingit, Athabascan, Yupik, and Filipino. Her artwork is diverse, ranging from traditional Northwest Coast design elements (known as formline) to contemporary multimedia pieces. Her work often explores themes of identity, connection to land, and the interplay between traditional and modern ways of life. In addition to creating art, Crystal is also an advocate for Indigenous rights and works to promote cultural awareness and understanding through her art. For this custom print, she began with the relationship Tommy Bahama has with the water and created a bold and powerful interpretation of salmon, seals, and killer whales swimming together.

## COSTA RICAN BLOOMS

by Susana Rubinstein

Born in Asunción, Paraguay, Susana Rubinstein Montes de Oca has had a passion for art since youth. After opening a craft shop with her sister, she educated herself in many different mediums and styles, from coffee-wood keychains to abstract painting. Many of Susana's pieces reflect her emotions in the moment. For this custom print, she was inspired by Costa Rica's national flower: a species of orchid that, according to local tradition, brings good luck and fortune. Created by using acrylic paint and blowing through a straw to move the pigments, this print makes for a striking and elevated design that waves elegantly with movement.

## MAGNOLIA BLOOMS

by Jeremy Kalteux

A proud Georgian, Jeremy Kalteux is a graduate of the University of Georgia with a Bachelor of Fine Arts degree in Textile Design. The recipient of several accolades throughout his academic and professional career, Jeremy was a 2020 Fashion Scholarship Fund recipient. He is a dedicated member of various industry groups and is the president of the Fashion Design Association. For this custom print, Jeremy wanted to pay homage to his Georgia roots and was inspired by his fond memories of blossoming magnolia trees—but the love of his home state doesn't stop there. Under the button placket is a small, woven label patch of a "Georgia Peach" for a little extra something sweet.

## COASTAL COMFORTS

by Ahmrii Johnson

A recent graduate of Parsons School of Design in New York, Ahmrii Johnson received a Bachelor of Fine Arts degree in Fashion Design with a minor in Sociology. Throughout her education, she's had a great deal of experience in the fashion industry, interning with world-renowned luxury fashion brands. Ahmrii has also been the recipient of several prestigious awards and is a two-time winner of the Virgil Abloh™ "Post-Modern" Scholarship. For this eye-catching custom print, Ahmrii utilized paints on a wood board, creating a unique effect that allows for the wood-grain texture to be seen layered underneath the vivid tropical landscape.

## PREFERRED FIBER INFORMATION FOR TOMMY BAHAMA APPAREL

Preferred fibers are those that make a smaller environmental and/or social impact than their conventional counterparts. Tommy Bahama uses Textile Exchange's Preferred Fiber and Materials Matrix to help define its preferred fibers. Styles indicating the use of preferred fibers are subject to change.

---

### MANMADE CELLULOSIC FIBERS (MMCFs)

MMCFs are made from wood pulp, derived from trees or plants. Conventional MMCFs can be made with wood harvested from ancient or endangered forests, use significant amounts of harmful chemicals, water, and energy to produce, and emit large amounts of greenhouse gases.

#### LENZING™

Lenzing™ is a leading manufacturer of preferred MMCFs, including Tencel™ Lyocell, Tencel™ Modal, and Lenzing™ EcoVero™ Viscose. Lenzing's fibers are sourced through responsibly-managed forests certified to FSC and PEFC standards. They also process the fiber responsibly, using processes that recapture most of the chemicals used in production and minimize water and energy use.

- Tencel™ Lyocell production recycles process water and reuses the solvent at a recovery rate of more than 99.5%.
- Tencel™ Modal production causes around 81.5 percent less greenhouse gas emissions than generic modal, and Tencel™ Modal fibers are STANDARD 100 by OEKO-TEX® certified.
- Lenzing™ EcoVero™ Viscose has up to 50% fewer emissions and 50% less water impact than conventional viscose.

#### BIRLA

Birla is another manufacturer of preferred MMCFs, producing Birla Cellulose. Birla's wood sourcing policies meet stringent global standards, with certifications like FSC, PEFC, and SFI. Birla works to reduce the water and energy used in and waste generated by fiber production.

---

### COTTON

Conventional cotton is natural and renewable, but it may be grown using GMO seeds, large amounts of water, and hazardous chemicals in pesticides, insecticides, and defoliants. Cotton growing can also result in water and soil contamination, soil degradation, and biodiversity loss.

#### ORGANIC COTTON

Organic cotton is grown organically, from non-genetically modified plants and without the use of synthetic chemicals in fertilizers, insecticides, and pesticides. Its cultivation helps build organic matter in the soil and air, reduce water contamination, increase soil fertility and biodiversity, reduce human and wildlife health hazards, and reduce greenhouse gas emissions resulting from the production of synthetic fertilizers and pesticides.

### BETTER COTTON

Tommy Bahama joined the Better Cotton Initiative (BCI) in 2020 to demonstrate our commitment to improving cotton farming globally. BCI is the world's leading sustainability initiative for cotton. Their mission is to help cotton communities survive and thrive, while protecting and restoring the environment. We have committed to sourcing at least 25% of our cotton as Better Cotton in 2022.

Better Cotton is sourced via a chain of custody model called mass balance. This means that Better Cotton is not physically traceable to end products; however, Better Cotton farmers benefit from the demand for Better Cotton in equivalent volumes to those we source.

---

### POLYESTER

Conventional polyester is derived from petroleum, a non-renewable resource with complicated social and political implications. Polyester's production generally requires high amounts of energy, may pollute water, and emits large amounts of greenhouse gases.

#### RECYCLED POLYESTER

Recycled polyester is made from existing polyethylene terephthalate (PET), the chemical name for polyester. It can be sourced from factory waste, unused fabric (deadstock), or reclaimed plastic bottles. It lessens the use of petroleum as a raw material in production, diverts plastic and fabric waste from landfills, and reduces greenhouse gas emissions.

#### REPREEVE® POLYESTER

REPREEVE® Polyester is made from recycled plastic bottles. It keeps bottles out of landfills and oceans, conserves energy and water, and reduces greenhouse gas emissions and petroleum use.

#### COOLMAX® ECOMADE POLYESTER

Coolmax® EcoMade polyester is made from 100% recycled PET bottles or 100% pre-consumer textile waste from cutting rooms, helping to keep waste out of landfills and reduce petroleum use.

#### DUPONT™ SORONA®

Sorona® polyester is made in part from renewable plant-based ingredients and can be recycled in any normal polyester recycling stream. Its manufacturing process results in lower greenhouse gas emissions than conventional polyester.

## **MARKETING**

### **POINT OF SALE MATERIAL, IMAGERY AND ADVERTISING**

Tommy Bahama is committed to helping you promote our products in your store. New materials are available three times a year for the Spring (February), Summer/Fall (June) and Holiday (October) seasons. Due to usage agreements with models and photographers, we ask that you remain current with our new materials every six months. You can access all current, approved materials on our image site, ***tbwholesalemarketing.com***

#### **Our image site will allow you to:**

- › Access current line sheets
- › Download and review the Tommy Bahama Brand Guidelines
- › Order POS materials, including postcards, counter cards and posters available free of charge
- › Obtain the Tommy Bahama logo for use
- › Download seasonal images to use in store and for your advertising needs. All in-store visuals and advertising must be reviewed and approved by Tommy Bahama Marketing. The images on our site are low resolution for you to place in a proof. Once your proof is ready, please email it to [imageadv@tommybahama.com](mailto:imageadv@tommybahama.com) for review.

#### **Please keep the following in mind:**

- Tommy Bahama imagery and logos cannot be altered in any way or used in an ad promoting any other brand or service.
- Under no circumstances can Tommy Bahama be advertised off-price.
- Approved ads and imagery may be used for six months and should be changed when new imagery is made available.
- If you wish to produce materials that don't meet these requirements, please contact Tommy Bahama Marketing to determine if participation is possible.
